Profit before taxation	3,544	1,933	1,611	83.3

The Group's revenue dropped slightly by 1.4% to RM113.9 million for the quarter under review compared to RM115.5 million for the corresponding quarter last year. The decrease in revenue was contributed by lower average selling prices following the drop in raw material costs although business volume has increased.

The Group reported an increase of 83.3% in profit before taxation to RM3.5 million for the current quarter compared to that of the corresponding quarter last year due mainly to better margins despite the impairment loss on goodwill on acquisition amounting to RM2.7 million.

The Group also achieved an increase in profit after taxation of 42.3% for the quarter under review in line with the higher profit before taxation and overprovision of deferred tax in prior year.

#### B 2 Variance of results against preceding quarter

Profit after taxation	5,349	3,003	2,346	78.1

The Group's revenue was maintained for the quarter under review compared to that registered for the preceding quarter.

The Group achieved a slight improvement in profit before taxation of 1.5% for the current quarter under review compared to RM3.5 million achieved for the preceding quarter. Although profit has improved for the current quarter, this was impacted by the impairment loss on goodwill on acquisition as mentioned above.

The Group also recorded a substantial increase in profit after taxation of 78.1% for the current quarter due to overprovision of deferred tax in prior year.

#### **B3** Prospects

In the second quarter of 2016, the global economy expanded at a more moderate pace, with uneven growth momentum across economies. Growth remained modest in the advanced economies amid continued cyclical and structural weaknesses. In Asia, economic expansion was supported by domestic demand, but was weighed down by persistent weakness in export performance.

The Malaysian economy expanded by 4.0% in the second quarter of 2016 (1Q 2016: 4.2%). Private sector expenditure remained the key driver of growth and contributed towards the continued expansion in domestic demand. The volatility of both aluminium prices and currencies continue to add uncertainties to our decision-making process particularly on pricing whilst the overall increase in costs of doing business in Malaysia will have adverse impacts on the Group's margins. The Group will remain vigilant and be well prepared for the volatilities and challenges ahead. As usual, we will continuously focus on improving cost efficiencies and recovery to mitigate any adverse impacts on our business.

Barring unforeseen circumstances, the Board is optimistic that the Group will remain profitable for the forthcoming quarter.
