The Group's revenue decreased slightly by 0.5% to RM120.1 million for the quarter under review compared to RM120.7 million for the corresponding quarter last year. The decrease in revenue was due mainly to lower business volume although average selling prices were higher as a result of the increase in raw material costs.

The Group registered a decrease in profit before taxation of 23.6% for the current quarter compared to the corresponding quarter last year due mainly to lower business volume compounded by slightly lower margins.

The Group reported a decrease in profit after taxation of 36.6% for the quarter under review in line with the lower profit before taxation as compared to the corresponding quarter last year. The decrease is also as a result of higher provision for income tax due to the effect of certain expenses not deductible for tax purpose.

The Group's revenue increased by 15.1% for the quarter under review compared to RM104.4 million registered for the preceding quarter. The increase in revenue was contributed by higher average selling prices as a result of the increase in raw material costs although business volume was lower.

The Group registered a decrease in profit before taxation of 8.8% for the current quarter under review compared to RM4.5 million achieved for the preceding quarter due mainly to lower business volume and reduced margins.

The Group also registered a decrease of 21.2% in profit after taxation to RM3.0 million for the current quarter compared to that of the preceding quarter due to higher provision for income tax.

B3 Prospects

Global economic activity continued to expand in the third quarter of 2017. Third quarter GDP releases showed sustained growth in the advanced economies, supported by private consumption and investment. This continued to provide support to global demand, as imports from the advanced economies expanded further. Domestic demand in China remained supportive of growth and global trade, albeit at a marginally more moderate pace. As a result, Asia continued to benefit from these favourable external developments, augmenting the strength in domestic demand.

Given the continued strong performance in the third quarter, the Malaysian economy is on track to register stronger growth in 2017. Domestic demand will remain the key driver of growth, albeit at a more moderate pace, reflecting the continued public sector consolidation. The strengthening Ringgit Malaysia will have adverse impacts on the Group exports' margin although the effect on local business is expected to be limited. In addition, the increase in natural gas pricing which will take effect from 1 January 2018 would have an unfavourable effect on the Group's margins. Notwithstanding, the strength of the Malaysian economy will continue to underpin support for local demand which should enhance our prospect moving forward. As usual, the Group will focus its efforts to improving cost efficiencies and recovery to maintain our margins.

Barring unforeseen circumstances, the Board is optimistic that the Group will remain profitable for the forthcoming quarter.

B4 Variance of actual and profit estimate

Not applicable as no profit forecast was published.
