QUARTERLY REPORT ON CONSOLIDATED RESULTS For The Third Quarter Ended 30 Sept 2007

B ADDITIONAL INFORMATION REQUIRED BY THE BURSA MALAYSIA SECURITIES BERHAD'S LISTING REQUIREMENTS

B1 Review of performance

For the current quarter ended 30 September 2007, the Group recorded a revenue of RM15.75 million against RM14.45 million in the corresponding quarter ended 30 September 2006, an increase of RM1.30 million or 9.0%. However, the profit before taxation for the Group decreased by RM0.57 million or 16.1% to RM2.97 million compared to RM3.54 million in the corresponding quarter ended 30 September 2006 due mainly to the higher depreciation charges and increased overhead incurred for the fifth production line which commenced production in Dec 2006, the appreciation of the Malaysian Ringgit against the US Dollar thus negatively affecting our sales revenue, and the higher expenses incurred to promote sales with the increase in production capacity.

B2 Variation of results against preceding quarter

The Group recorded a revenue of RM15.75 million for the current quarter under review against RM15.45 in the preceding quarter, an increase of RM0.3 million or 1.9%. However, the profit before tax of RM2.97 million was lower by RM0.3 million or 8.0% compared to the RM3.23 million achieved in the preceding quarter due mainly to the higher production costs and the higher expenses incurred to promote sales with the increase in production capacity.

The profit after tax of RM2.85 million was lower by RM0.18 million or 5.9% compared to the RM3.03 million achieved in the preceding quarter due mainly to the higher cost of sales and the higher expenses incurred to promote sales with the increase in production capacity in the current quarter compared to the preceding quarter.

B3 Prospects

The Board expects the remaining quarter of the year to continue to remain challenging for the Group. As export revenue accounts for the bulk of the Group's total revenue and all the Group's exports are quoted in US Dollars, the appreciation of the Malaysian Ringgit against the US Dollar will continue to erode the Group's revenue and squeeze its profit margins. Further, the appreciation of the Japanese Yen against the Malaysian Ringgit is also expected to increase the Group's production cost as the main raw material used by the Group, resin, is imported from Japan.

To mitigate these negative developments, the Group will continue with its ongoing efforts to enhance productivity and efficiency, expand its customer base and increase sales, especially of higher value products with higher margins including color toners. In addition, the Group will continue to maintain a natural hedge against currency fluctuations by matching its trade receipts which are mainly denominated in US Dollars with the settlement of trade payables on raw material purchases which are transacted in US Dollars and Japanese Yen. The Group will also continue to monitor its foreign exchange exposure closely and take the necessary steps to minimize its exposure whenever appropriate.

The strengthening Japanese Yen affects not only the Group but also the Group's major competitors throughout the world as resin manufacturers in Japan are their main suppliers as well. Thus, it has not affected the Group's competitive position in the global market. On the contrary, as Japanese toner manufacturers are the Group's main competitors, the Board expects the strengthening Japanese Yen to improve the Group's competitive position.

B4 Profit forecast and profit guarantee

No profit forecast or profit guarantee has been issued by the Group.

B5 Taxation

	Current quarter 30 Sep 2007 RM'000	Current year to date 30 Sep 2007 RM'000
Income tax	115	443
Deferred tax	5	105
	<u>120</u>	<u>548</u>

Tax expense for the current quarter ended 30 September 2007 is derived based on management's best estimate of the tax rate for the year. The deferred tax liabilities arose from accelerated capital allowances over depreciation of qualifying plant and equipment and the effect arising from the revaluation of freehold land and building. The effective tax rate for the period presented above is lower than the statutory tax rate principally due to the tax savings arising from the investment allowances available.

B6 Unquoted investments and properties

There were no changes in the unquoted investments and properties of the Group during the current quarter under review.

B7 Quoted securities

There were no acquisitions or disposals of quoted securities during the current quarter under review.
