a) Performance of current quarter against the preceding year's corresponding quarter

The Group registered revenue from continuing operations of RM21.78 million in current quarter, representing a decline of 3.57%, compared to the preceding year corresponding quarter's revenue from continuing operations of RM22.59 million. The decline in revenue was mainly affected by challenging market environments.

Despite the decrease in revenue, the Group achieved a higher profit before taxation from continuing operations of RM9.86 million, compared to the preceding year corresponding quarter's loss before taxation of RM0.44 million. The improvement in profit was largely attributed to higher gain on disposal of non-current asset held for sale.

For the quarter under review, the retail segment reported a higher profit of RM10.23 million compared to a loss of RM0.037 million in the preceding year's corresponding quarter. The improvement of profit was driven primarily by the non-recurring income as elaborated above.

In addition, the investment holding segment's revenue was maintained at the same level in the current quarter as compared to the preceding year's corresponding quarter whilst the segment's loss decreased to RM0.37 million as compared to the preceding year's corresponding quarter of RM0.46 million. A decrease in this segment loss was mainly due to the lower operating expenses incurred in the current quarter.

b) Performance of current 12 months' period against the preceding year's corresponding period

For the financial year ended 31 March 2014, the Group posted an increase in revenue from its continuing operation of RM91.25 million, representing an increase of 3.7% against the previous financial year of RM88.01 million. Revenue growth was mainly driven by our retailing segment.

The Group achieved a higher profit before taxation from continuing operations of RM16.12 million in the current financial year ended 31 March 2014 compared to RM13.71 million in the previous financial year ended 31 March 2013. During the financial year, the Group registered a gain on disposal of non-current asset held for sale of RM13.72 million, which largely accounted for the increase in profit before taxation.

Retailing Segment

The revenue increased by 3.7% to RM91.23 million against the previous financial year ended 31 March 2013 of RM88.0 million. The positive revenue growth was mainly attributed to the new leather goods brand.

The segment profit increased significantly to RM13.94 million in this current financial year ended 31 March 2014 against the previous financial year of RM5.02 million. The increase in profit was mainly on account of the increase in other income as elaborated above.

Investment Holding Segment

The revenue remains fairly stable at RM0.02 million for the current year ended 31 March 2014 and the preceding year. However, the segment profit reduced to RM2.30 million in the current year as compared to preceding year of RM8.27 million. The decrease in profit was primarily resulted from the recognition of non-recurring income in the preceding year.

B2. COMPARISON WITH IMMEDIATE PRECEEDING QUARTER'S RESULTS

The Group recorded a higher profit before taxation from continuing operations of RM9.86 million for the current quarter, as compared to the profit before taxation from continuing operations of RM1.41 million for the immediate preceding quarter. Again this was mainly due to the retailing segment that registered a gain on disposal of non-current asset held for sale of RM10.30 million .

B3. COMMENTARY ON PROSPECTS

The Group has anticipated that the group's business segments will remain challenging due to rising cost and a more competitive environment.

B4. PROFIT FORECAST OR PROFIT GUARANTEE
