Construction

The construction business recorded a turnover of RM2.6 million in the current quarter which was lower than the preceding year corresponding quarter of RM21.9 million. The revenue in the current period was lower as most of the older projects had their contracts ended prematurely on grounds of feasibility to continue after prolonged periods of slowdown in work progress. This also included the mutual termination of the Penang Package 2 project which saw downward adjustment to its revenue recognised in anticipation of final lower billings. Overall, current year to date revenue was RM8.2 million as compared to preceding year to date revenue of RM32.4 million. The current year to date revenue was lower as during the first 2 quarters of the current financial year, the Movement Control Order had significantly affected progress of construction works, besides the reason mentioned for the current quarter.

Loss before tax was recorded at RM4.6 million in the current quarter compared to loss before tax of RM4.4 million in the preceding year corresponding quarter mainly due to the downward adjustment in revenue recognised for the Penang Package 2 project in the current quarter, resulting in gross loss of approximately RM2.06 million for the said project. Overall, current year to date loss before tax was RM8.2 million as compared to preceding year to date loss before tax of RM8.9 million. The main reason for this was due to lesser overall activity in the current financial period, besides the fact that during the previous financial period, there was equity share based payment expenses of RM0.7 million from the implementation of the Share Issuance Scheme.
