Amendment to FRS 139	Financial Instruments: Recognition and Measurement
Amendment to FRS 140	Investment Property

Other than for the application of FRS 101 (revised), FRS 139 and Amendment to FRS 117, the application of the above FRSs, Amendments to FRSs and Interpretations did not result in any significant changes in the accounting policies and presentations of the financial results of the Group.

FRS 101 (revised): Presentation of Financial Statements

The revised FRS 101 separates owner and non-owner changes in equity. Therefore, the consolidated statement of changes in equity will now include only detail of transactions with owners. All non-owner changes in equity are presented as a single line labelled as total comprehensive income. The Standard also introduces the statement of comprehensive income: presenting all items of income and expense recognised in the statement of comprehensive income. The adoption of this standard does not have any impact on the financial position and results of the Group.

Amendment to FRS 117: Leases

Prior to the adoption of the Amendment to FRS 117, leasehold lands were treated as operating leases. The considerations paid were classified and presented as prepaid lease payment on the statement of financial position. With the adoption of the Amendment to FRS 117, the classification of a leasehold land as a finance lease or an operating lease is based on the extent to which risks and rewards incident to ownership lie.

Accordingly, the Group has applied the change in accounting policy and changed the classification of long leasehold lands (unexpired period more than 50 years) from operating leases to finance leases in the current quarter. This change in classification has no effect to the profit or loss of the current period ended 31 March 2010 or the comparative prior period. The effect of the reclassification to the comparative of the prior year's statement of financial position is as follows:

Balance Sheet As at 31 December 2009	As previously stated (RM'000)	Effect on adoption of FRS 117 (RM'000)	As restated (RM'000)
Prepaid land lease payments	5,721	(3,360)	2,361
Property, plant and equipment	151,515	3,360	154,875

<u>FRS 139: Financial Instruments: Recognition and Measurement</u>

FRS 139 sets out the new requirements for the recognition and measurement of the Group's financial instruments. Financial instruments are recorded initially at fair value. Subsequent measurement of the financial instruments at the balance sheet date reflects the designation of the financial instruments. The Group determines the classification at initial recognition and for the purpose of the first adoption of the standard, as at transitional date on 1 January 2010.

Financial assets

Financial assets are classified as financial assets at fair value through profit or loss, loans and receivables, held to maturity investments, available for sale financial assets, or as derivatives designated as hedging instruments in an effective hedge, as appropriate.

The Group's financial assets include cash and short-term deposits, loans and receivables and available-for-sale (AFS) investments.

(i) Loan and receivables
Prior to 1 January 2010, loans and receivables were stated at gross receivables less provision for doubtful debts. Under FRS 139, loans and receivables are initially measured at fair value and subsequently at amortised cost using the effective interest rate (EIR) method. Gains and losses arising from the derecognition of the loans and receivables, EIR amortisation and impairment losses are recognised in income statement.

(ii) AFS investment
Prior to 1 January 2010, AFS financial assets such as investments were accounted for at cost adjusted for amortisation of premium and accretion of discount less impairment or at the lower of cost and market value, determined on an aggregate basis. Under FRS 139, AFS financial assets is measured at fair value initially and subsequently with amortisation of premium with accretion of discount and other accrual of income recognised in statement of comprehensive income and with unrealised gains or losses recognised in statement of other comprehensive income and removed from AFS reserve.

Financial liabilities

Financial liabilities are classified as financial liabilities at fair value through profit or loss, loans and borrowings or as derivatives designated as hedging instruments in an effective hedge, as appropriate.

The Group's financial liabilities include trade and other payables carried at amortised cost and financial liabilities at fair value.

PART B: ADDITIONAL INFORMATION REQUIRED BY THE BURSA MALAYSIA SECURITIES BERHAD'S LISTING REQUIREMENTS

B1. Review of Performance for the Quarter

The Group recorded revenue of RM87.4 million for the current quarter against RM151.2 million in the corresponding quarter of 2009, a decrease of 42%. The decrease was mainly due to lower revenue recognised from the ongoing monorail project and lower sales from the Machine Shop unit.

Net profit for the current quarter of RM2.7 million included a provisional gain on disposal of the Machine Shop Business of RM22.3 million. Excluding the provisional gain on disposal, the Group registered a loss after tax of RM19.6m for the current quarter compared to a net profit of RM19.3 million in the corresponding quarter in 2009. This was mainly arising from the current quarter loss recorded in the Machine Shop and Rail units due to lower revenue and cost revision resulting in an increase in the estimated costs to completion and reduction in the attributable profit on the monorail project.

For the period ended 30 June 2010, revenue for the Group decreased 22% to RM216.4 million mainly attributed to lower revenue from the Machine Shop unit. Excluding the provisional gain on disposal of the Machine Shop Business, the Group recorded a loss after tax of RM11.6 million primarily due to lower contribution from Machine Shop business and the cost revision on the monorail project as mentioned above.

B2. Results against Preceding Quarter

The Group recorded lower revenue for the current quarter of RM87.4 million compared to RM128.9 million in the preceding quarter, a decline of 32%. Excluding the provisional gain on disposal of the Machine Shop Business, the Group recorded a loss after tax of RM19.6 million against a net profit of RM8.1 million. Lower revenue and loss after tax were due primarily to lower revenue and current quarter loss recorded in the Machine Shop and Rail units as well as the cost revision on the monorail project as mentioned above.

B3. Current Year Prospects

The Group will continuously pursue opportunities in monorail projects especially in Malaysia, Brazil and India to capitalize on the increasing demand and opportunities for infrastructure development in these countries. The Group is differentiating its brand through technology evolution and cost effectiveness to penetrate into emerging markets.

The outlook for the Group in 2010 is expected to be challenging for the remainder of the year.
