2. Significant accounting policies (continued)**(e) Leased assets****(i) Finance lease**

Leases in terms of which the Group or the Company assumes substantially all the risks and rewards of ownership are classified as finance leases. Upon initial recognition, the leased asset is measured at an amount equal to the lower of its fair value and the present value of the minimum lease payments. Subsequent to initial recognition, the asset is accounted for in accordance with the accounting policy applicable to that asset.

Minimum lease payments made under finance leases are apportioned between the finance expense and the reduction of the outstanding liability. The finance expense is allocated to each period during the lease term so as to produce a constant periodic rate of interest on the remaining balance of the liability. Contingent lease payments are accounted for by revising the minimum lease payments over the remaining term of the lease when the lease adjustment is confirmed.

Leasehold land which in substance is a finance lease is classified as property, plant and equipment or as investment property if held to earn rental income or for capital appreciation or for both.

(ii) Operating lease

Leases where the Group or the Company does not assume substantially all the risks and rewards of the ownership are classified as operating leases and, except for property interest held under operating lease, the leased assets are not recognised on the statement of financial position. Property interest held under an operating lease, which is held to earn rental income or for capital appreciation or both, is classified as investment property.

Payments made under operating leases are recognised in profit or loss on a straight-line basis over the term of the lease unless another systematic basis is more representative of the time pattern in which economic benefits from the leased asset are consumed. Lease incentives received are recognised in profit or loss as an integral part of the total lease expense, over the term of the lease. Contingent rentals are charged to profit or loss in the reporting period in which they are incurred.

Leasehold land which in substance is an operating lease is classified as property, plant and equipment.

2. Significant accounting policies (continued)**(f) Intangible assets****(i) Goodwill**

Goodwill arising on business combinations is measured at cost less any accumulated impairment losses. In respect of equity-accounted associate, the carrying amount of goodwill is included in the carrying amount of the investment and an impairment loss on such an investment is not allocated to any asset, including goodwill that forms part of the carrying amount of the equity-accounted associate.

(ii) Contract value

Contract value relates to an eight (8) years' exclusive agreement beginning from financial year 2008 to supply British American Tobacco's printed carton requirements in several locations in the Asia Pacific region, with a right to extend the supply period for an additional three (3) years.

Contract value is stated at cost less accumulated amortisation and impairment losses.

(iii) Subsequent expenditure

Subsequent expenditure is capitalised only when it increases the future economic benefits embodied in the specific asset to which it relates. All other expenditure, including expenditure on internally generated goodwill and brands, is recognised in profit or loss as incurred.

(iv) Amortisation

Amortisation is based on the cost of an asset less its residual value.

Goodwill with indefinite useful life is not amortised but are tested for impairment annually and whenever there is an indication that they may be impaired.

Contract value is amortised from the date it is available for use. Amortisation is recognised in profit or loss based on the supply period of eleven (11) years from the date that the contract value is available for use.

Amortisation methods, useful lives and residual values are reviewed at the end of each reporting period and adjusted, if appropriate.

2. Significant accounting policies (continued)**(g) Inventories**

Inventories are measured at the lower of cost and net realisable value.

The cost of inventories is calculated using the weighted average cost method, and includes expenditure incurred in acquiring the inventories, production or conversion costs and other costs incurred in bringing them to their existing location and condition. In the case of work-in-progress and finished goods, cost includes an appropriate share of production overheads based on normal operating capacity.

Net realisable value is the estimated selling price in the ordinary course of business, less the estimated costs of completion and the estimated costs necessary to make the sale.

(h) Cash and cash equivalents

Cash and cash equivalents consist of cash on hand, balances and deposits with banks which have an insignificant risk of changes in fair value with original maturities of three months or less, and are used by the Group and the Company in the management of their short-term commitments. For the purpose of the statements of cash flows, cash and cash equivalents are presented net of pledged deposits.

(i) Impairment**(i) Financial assets**

All financial assets (except for investments in subsidiaries, investment in associate and investment in joint venture) are assessed at each reporting date whether there is any objective evidence of impairment as a result of one or more events having an impact on the estimated future cash flows of the asset. Losses expected as a result of future events, no matter how likely, are not recognised. For an investment in an equity instrument, a significant or prolonged decline in the fair value below its cost is an objective evidence of impairment. If any such objective evidence exists, then the impairment loss of the financial asset is estimated.

An impairment loss in respect of loans and receivables is recognised in profit or loss and is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows discounted at the asset's original effective interest rate. The carrying amount of the asset is reduced through the use of an allowance account.

31

2. Significant accounting policies (continued)**(i) Impairment (continued)****(i) Financial assets (continued)**

An impairment loss in respect of unquoted equity instrument that is carried at cost is recognised in profit or loss and is measured as the difference between the financial asset's carrying amount and the present value of estimated future cash flows discounted at the current market rate of return for a similar financial asset or cash-generating unit.

If, in a subsequent period, the fair value of a debt instrument increases and the increase can be objectively related to an event occurring after the impairment loss was recognised in profit or loss, the impairment loss is reversed, to the extent that the asset's carrying amount does not exceed what the carrying amount would have been had the impairment not been recognised at the date the impairment is reversed. The amount of the reversal is recognised in the profit or loss.

(ii) Other assets

The carrying amounts of other assets (except for inventories, deferred tax assets and assets arising from employee benefits) are reviewed at the end of each reporting period to determine whether there is any indication of impairment. If any such indication exists, then the asset's recoverable amount is estimated. For goodwill, and intangible assets that have indefinite useful lives or that are not yet available for use, the recoverable amount is estimated each period at the same time.

For the purpose of impairment testing, assets are grouped together into the smallest group of assets that generates cash inflows from continuing use that are largely independent of the cash inflows of other assets or cash-generating units. Subject to an operating segment ceiling test, for the purpose of goodwill impairment testing, cash-generating units to which goodwill has been allocated are aggregated so that the level at which impairment testing is performed reflects the lowest level at which goodwill is monitored for internal reporting purposes. The goodwill acquired in a business combination, for the purpose of impairment testing, is allocated to cash-generating units that are expected to benefit from the synergies of the combination.

The recoverable amount of an asset or cash-generating unit is the greater of its value in use and its fair value less costs of disposal. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset.

32

2. Significant accounting policies (continued)**(i) Impairment (continued)****(ii) Other assets (continued)**

An impairment loss is recognised if the carrying amount of an asset or its related cash-generating unit exceeds its estimated recoverable amount.

Impairment losses are recognised in profit or loss. Impairment losses recognised in respect of cash-generating units are allocated first to reduce the carrying amount of any goodwill allocated to the cash-generating unit (group of cash-generating units) and then to reduce the carrying amount of the other assets in the cash-generating unit (groups of cash-generating units) on a *pro rata* basis.

An impairment loss in respect of goodwill is not reversed. In respect of other assets, impairment losses recognised in prior periods are assessed at the end of each reporting period for any indications that the loss has decreased or no longer exists. An impairment loss is reversed if there has been a change in the estimates used to determine the recoverable amount since the last impairment loss was recognised. An impairment loss is reversed only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined, net of depreciation or amortisation, if no impairment loss had been recognised. Reversals of impairment losses are credited to profit or loss in the financial year in which the reversals are recognised.

(j) Equity instruments

Instruments classified as equity are measured at cost on initial recognition and are not remeasured subsequently.

(i) Issue expenses

Costs directly attributable to the issue of instruments classified as equity are recognised as a deduction from equity.

(ii) Ordinary shares

Ordinary shares are classified as equity.

2. Significant accounting policies (continued)**(k) Employee benefits****(i) Short-term employee benefits**

Short-term employee benefit obligations in respect of salaries, annual bonuses, paid annual leave and sick leave are measured on an undiscounted basis and are expensed as the related service is provided.

A liability is recognised for the amount expected to be paid under short-term cash bonus or profit sharing plans if the Group has a present legal or constructive obligation to pay this amount as a result of past service provided by the employee and the obligation can be estimated reliably.

(ii) Long service leave

The liability of long service leave is recognised in the provision for employee benefits and is measured as the present value of the expected future payments to be made in respect of services provided by an employee up to the reporting date using the projected unit credit method. Consideration is given to expected future wage and salary levels, experience of employee departures and periods of service. Expected future payments are discounted using market yields at the reporting date on national government bonds with terms to maturity and currency that match, as closely as possible, the estimated future cash outflows.

(iii) State plans

The Group's contributions to statutory pension funds are charged to profit or loss in the financial year to which they relate. Prepaid contributions are recognised as an asset to the extent that a cash refund or a reduction in future payments is available. Once the contributions have been paid, the Group has no further payment obligations.

(iv) Defined benefit plans

The Group's net obligation in respect of defined benefit plans is calculated separately for each plan by estimating the amount of future benefit that employees have earned in the current and prior periods, discounting that amount and deducting the fair value of any plan assets.

The calculation of defined benefit obligations is performed by the management using the projected unit credit method, a method which is consistent with the computation by the qualified actuary employed in prior years. When the calculation results in a potential asset for the Group, the recognised asset is limited to the present value of economic benefits available in the form of any future refunds from the plan or reductions in future contributions to the plan. To calculate the present value of economic benefits, consideration is given to any applicable minimum funding requirements.

34

2. Significant accounting policies (continued)**(k) Employee benefits (continued)****(iv) Defined benefit plans (continued)**

Re-measurements of the net defined benefit liability, which comprise actuarial gains and losses, the return on plan assets (excluding interest) and the effect of the asset ceiling (if any, excluding interest), are recognised immediately in other comprehensive income. The Group determines the net interest expense or income on the net defined liability or asset for the period by applying the discount rate used to measure the defined benefit obligation at the beginning of the annual period to the then net defined benefit liability or asset, taking into account any changes in the net defined benefit liability or asset during the period as a result of contributions and benefit payments.

Net interest expense and other expenses relating to defined benefit plans are recognised in profit or loss.

When the benefits of a plan are changed or when a plan is curtailed, the resulting change in benefit that relates to past service or the gain or loss on curtailment is recognised immediately in profit or loss. The Group recognises gains and losses on the settlement of a defined benefit plan when the settlement occurs.

(l) Provisions

A provision is recognised if, as a result of a past event, the Group has a present legal or constructive obligation that can be estimated reliably, and it is probable that an outflow of economic benefits will be required to settle the obligation. Provisions are determined by discounting the expected future cash flows at a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability. The unwinding of the discount is recognised as finance cost.

(m) Contingent liabilities

Where it is not probable that an outflow of economic benefits will be required, or the amount cannot be estimated reliably, the obligation is not recognised in the statements of financial position and is disclosed as a contingent liability, unless the probability of outflow of economic benefits is remote. Possible obligations, whose existence will only be confirmed by the occurrence or non-occurrence of one or more future events, are also disclosed as contingent liabilities unless the probability of outflow of economic benefits is remote.

35

2. Significant accounting policies (continued)**(n) Revenue and other income****(i) Goods sold**

Revenue from the sale of goods in the course of ordinary activities is measured at fair value of the consideration received or receivable, net of returns and allowances, trade discount and volume rebates. Revenue is recognised when persuasive evidence exists, usually in the form of an executed sales agreement, that the significant risks and rewards of ownership have been transferred to the customer, recovery of the consideration is probable, the associated costs and possible return of goods can be estimated reliably, and there is no continuing management involvement with the goods, and the amount of revenue can be measured reliably. If it is probable that discounts will be granted and the amount can be measured reliably, then the discount is recognised as a reduction of revenue as the sales are recognised.

(ii) Dividend income

Dividend income is recognised in profit or loss on the date that the Group's or the Company's right to receive payment is established, which in the case of quoted securities is the ex-dividend date.

(iii) Rental income

Rental income is recognised in profit or loss on a straight-line basis over the term of the lease. Lease incentives granted are recognised as an integral part of the total rental income, over the term of the lease.

(iv) Interest income

Interest income is recognised as it accrues using the effective interest method in profit or loss except for interest income arising from temporary investment of borrowings taken specifically for the purpose of obtaining a qualifying asset which is accounted for in accordance with the accounting policy on borrowing costs.

AUDITED CONSOLIDATED FINANCIAL STATEMENTS OF OUR COMPANY FOR THE FYE 31 DECEMBER 2015 TOGETHER WITH THE AUDITORS' REPORT THEREON (CONT'D)

36

2. Significant accounting policies (continued)**(o) Borrowing costs**

Borrowing costs that are not directly attributable to the acquisition, construction or production of a qualifying asset are recognised in profit or loss using the effective interest method.

Borrowing costs directly attributable to the acquisition, construction or production of qualifying assets, which are assets that necessarily take a substantial period of time to get ready for their intended use or sale, are capitalised as part of the cost of those assets.

The capitalisation of borrowing costs as part of the cost of a qualifying asset commences when expenditure for the asset is being incurred, borrowing costs are being incurred and activities that are necessary to prepare the asset for its intended use or sale are in progress. Capitalisation of borrowing costs is suspended or ceases when substantially all the activities necessary to prepare the qualifying asset for its intended use or sale are interrupted or completed.

Investment income earned on the temporary investment of specific borrowings pending their expenditure on qualifying assets is deducted from the borrowing costs eligible for capitalisation.

(p) Income tax

Income tax expense comprises current and deferred tax. Current and deferred tax are recognised in profit or loss except to the extent that it relates to a business combination or items recognised directly in equity or other comprehensive income.

Current tax is the expected tax payable on the taxable income for the year, using tax rates enacted or substantively enacted by the end of the reporting period, and any adjustments to tax payable in respect of previous financial years.

Deferred tax is recognised using the liability method, providing for temporary differences between the carrying amounts of assets and liabilities in the statement of financial position and their tax bases. Deferred tax is not recognised for the following temporary differences: the initial recognition of goodwill and contract value, the initial recognition of assets or liabilities in a transaction that is not a business combination and that affects neither accounting nor taxable profit or loss. Deferred tax is measured at the tax rates that are expected to be applied to the temporary differences when they reverse, based on the laws that have been enacted or substantively enacted by the end of the reporting period.

37

2. Significant accounting policies (continued)**(p) Income tax (continued)**

A deferred tax asset is recognised to the extent that it is probable that future taxable profits will be available against which the temporary difference can be utilised. Deferred tax assets are reviewed at the end of each reporting period and are reduced to the extent that it is no longer probable that the related tax benefit will be realised.

Unutilised reinvestment allowance and investment tax allowance, being tax incentives that is not a tax base of an asset, is recognised as a deferred tax asset to the extent that it is probable that the future taxable profits will be available against the unutilised tax incentive can be utilised.

Deferred tax asset and liabilities are offset if there is a legally enforceable right to offset current tax liabilities and assets, and they relate to income taxes levied by the same tax authority on the same taxable entity, or on different tax entities, but they intend to settle current tax liabilities and assets on a net basis or their tax assets and liabilities will be realised simultaneously.

(q) Earnings per ordinary share

The Group presents basic earnings per share data for its ordinary shares ("EPS").

Basic EPS is calculated by dividing the profit or loss attributable to ordinary shareholders of the Company by the weighted average number of ordinary shares outstanding during the period, adjusted for own shares held.

(r) Operating segments

An operating segment is a component of the Group that engages in business activities from which it may earn revenues and incur expenses, including revenues and expenses that relate to transactions with any of the Group's other components. The Group's operating segment results are reviewed regularly by the chief operating decision maker, which in this case is the Board of Directors of the Group, to make decisions about the resources to be allocated to the segment and to assess its performance, and for which discrete financial information is available.

38

2. Significant accounting policies (continued)**(s) Fair value measurement**

Fair value of an asset or a liability, except for lease transactions, is determined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The measurement assumes that the transaction to sell the asset or transfer the liability takes place either in the principal market or in the absence of a principal market, in the most advantageous market.

For non-financial asset, the fair value measurement takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

When measuring the fair value of an asset or a liability, the Group uses observable market data as far as possible. Fair value are categorised into different levels in a fair value hierarchy based on the input used in the valuation technique as follows:

Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities that the Group can access at the measurement date.

Level 2: inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly.

Level 3: unobservable inputs for the asset or liability.

The Group recognises transfers between levels of the fair value hierarchy as of the date of the event or change in circumstances that caused the transfers.

(t) Non-current assets held for sale

Non-current assets that are expected to be recovered primarily through sale rather than through continuing use are classified as held for sale. Immediately before classification as held for sale, the assets, are remeasured in accordance with the Group's accounting policies. Thereafter, generally the assets are measured to the lower of their carrying amount and fair value less cost of disposal.

3.3 Change in estimates

During the financial year, the Group had assessed and reviewed the residual useful life of its property, plant and equipment based on past experiences and machine vendor's validation. As a result of this review, the residual useful life of certain plant and machineries had been extended upwards by 8 to 15 years. The effect of these changes on depreciation expenses, recognised in cost of sales, in current and future periods are as follows:

4. Intangible assets (continued)

4.2 Impairment testing for cash-generating units containing goodwill and contract value (continued)

Goodwill and contract value are allocated to each unit expected to benefit from the synergies of the acquisitions. The recoverable amount for the Group was based on value in use calculations. The recoverable amount for the Group's cash-generating unit ("GCGU") covering operations in Australia, Vietnam and Malaysia is higher than the carrying amount of the goodwill and contract value allocated and hence no impairment loss was recognised on the Group's intangible assets during the year.

Note a

Value in use in respect of goodwill was determined by discounting the future cash flows generated from the continuing use of the unit and was based on the following key assumptions:

- Cash flows were projected based on a post-tax basis and correspondingly, post-tax discount rates were used.
- Cash flows were projected based on the 1 year (2014: 1 year) financial budget approved by management. Management has considered the factors applied in the financial budget. The budgeted gross margin is based on past experience.
- Terminal value at end of year 5 is based on year 5 projected cashflow discounted at the respective operating subsidiaries' discount rates and the tax rates are assumed to be:
 - statutory tax rates for subsidiaries in Malaysia, Australia and Vietnam.
 - zero tax rate for a subsidiary in Hong Kong, given current incentives enjoyed by that subsidiary which is zero-tax on export sales.
- An anticipated revenue growth rate of 5%, 11%, 6%, 0% and 0% in 2016, 2017, 2018, 2019 and 2020 respectively and thereafter zero growth was used in the cash flows (2014: -8%, 3%, 13%, 0% and 2% in 2015, 2016, 2017, 2018 and 2019 respectively and thereafter zero growth was used in cash flows).
- Discount rate used for each respective country is based on the country's weighted average cost of capital ("WACC") rate (post-tax rate), incorporating respective country's risk premium, and an Alpha factor of 2.5%. The post-tax discount rates for the operating subsidiaries are:
 - Malaysian subsidiary : 11% (pre-tax : 13.5%)
 - Vietnam subsidiary : 15% (pre-tax : 17.5%)
 - Australian subsidiary : 9.5% (pre-tax : 9.5%)
 - Hong Kong subsidiary : 10.5% (pre-tax : 10.5%)

45

4. Intangible assets (continued)**4.2 Impairment testing for cash-generating units containing goodwill and contract value (continued)**

- Pre-tax and post-tax rate for the Group's Hong Kong subsidiary is the same as zero-tax rate is applied thereon.
- Foreign currency exchange rates remained stable.
- Inflation and cost increase assumed to be zero as all cost increases are assumed to be passed on to customers.
- Assumed current level of annual maintenance costs is adequate to keep the machines in good working order.
- It is assumed that the replacement cost of the machines at terminal value in year 5 is based on a percentage of revenue (approximate to annual depreciation).
- The Group is expected to successfully renew its exclusive rights to supply a major customer's printed carton requirements upon the expiry of the agreement and to continue to supply over the projected period.
- The Group is be able to continue its recovery of higher wastage for low volume production runs.

Note b

Contract value is in relation to the exclusive rights to supply British American Tobacco's printed carton requirements in several locations in the Asia Pacific region. The contract was initially for a period of eight (8) years beginning from the financial year 2008, with a right to extend the supply period by an additional three (3) years.

For the purpose of impairment testing, the recoverable amount of the contract value is estimated using the present value of expected future cash flows generated by the contract value and based on the key assumptions as stated in item 4.2 (note a).

Management believes that any reasonable change in the key assumptions would not cause the carrying amount of the goodwill and contract value to exceed the recoverable amount. Based on the above review, there is no evidence of impairment on the Group's intangible assets.

14.1 Defined benefit obligation

The Group recognises provisions for a non-contributory defined benefit plan to provide pension for eligible employees. The plan entitles an employee to receive a lump sum payment equal to 86% of the employee's final monthly salary for each year of service the employee provided up to the date the benefit becomes payable.

Included in the non-current portion of the recognised liability for defined benefit obligations is provision for severance allowance of RM23,000 (2014: RM22,000) which is governed by the Vietnamese Labour Code ("VLC"), when employees who have worked for 12 months or more ("VLC eligible employees") voluntarily terminate their labour contracts, the employer is required to pay the VLC eligible employees severance allowance.

Pursuant to Vietnam Law on Social Insurance, effective from 1 January 2009, the Group and the employees under its purview are required to contribute to an unemployment insurance fund managed by the Vietnam Social Insurance Agency. The contribution to be paid by each party is calculated at 1% (2014: 1%) of the lower of the employees' basic salary and 20 times the general minimum salary level as specified by the Vietnam Government from time to time. With the implementation of the unemployment insurance scheme, the Group is no longer required to provide severance allowance for the service period after 1 January 2009. However, severance allowance to be paid to existing VLC eligible employees as of 31 December 2015 will be determined based on the VLC eligible employees' years of service as of 31 December 2008 and their average salary for the six-month period prior to the termination date.

Sensitivity analysis

Reasonably possible changes at the reporting date to one of the relevant actuarial assumptions, holding other assumptions constant, would have affected the defined benefit obligation by the amounts shown below.

| | Group | | Company | |
|---------------------------------------|--------------------|--------------------|--------------------|--------------------|
| | Increase RM'000 | Decrease RM'000 | Increase RM'000 | Decrease RM'000 |
| 2015 | | | | |
| Discount rate (1% movement) | (9) | 10 | (1) | 1 |
| Future salary growth (1% movement) | <u>17</u> | <u>(10)</u> | <u>7</u> | <u>(1)</u> |
| 2014 | | | | |
| Discount rate (1% movement) | (12) | 13 | (1) | 1 |
| Future salary growth (1% movement) | <u>27</u> | <u>(13)</u> | <u>15</u> | <u>(2)</u> |

Although the analysis does not account to the full distribution of cash flows expected under the plan, it does provide an approximation of the sensitivity of the assumptions shown.

14.2 Liability for long-service leave

The liability of long-service leave is the provision for employee benefits and measured as the present value of expected future payments to be made in respect of services provided by employees up to the reporting date using the projected unit credit method.

AUDITED CONSOLIDATED FINANCIAL STATEMENTS OF OUR COMPANY FOR THE FYE 31 DECEMBER 2015 TOGETHER WITH THE AUDITORS' REPORT THEREON (CONT'D)

68

24. Operating segments

The Group effectively has only one reportable segment. In the prior years, it was separately disclosed into two segments, namely Printing and Trading.

The Group now takes the view that there is effectively only one segment as both the printing business and trading activities are inter-twined and all purchases for the trading activities are from companies within the Group.

Other non-reportable segments comprise operations related to investment holdings and property investments.

Performance is measured based on segment profit before tax, interest, depreciation and amortisation, as included in the internal management reports that are reviewed by the Board of Directors. Segment profit is used to measure performance as management believes that such information is the most relevant in evaluating the results of segment relative to other entities that operate within these industries.

Segment assets

The total of segment assets is measured based on all assets (including goodwill) as included in the internal management reports that are reviewed by the Board of Directors. Segment total assets are used to measure the return of assets.

Segment liabilities

Segment liabilities information is neither included in the internal management reports nor provided regularly to the Board of Directors. Hence no disclosure is made on segment liabilities.

The Group maintains a level of cash and cash equivalents and bank facilities deemed adequate by the management to ensure, as far as possible, that it will have sufficient liquidity to meet its liabilities when they fall due.

It is not expected that the cash flows included in the maturity analysis could occur significantly earlier, or at significantly different amounts.

25.6 Market risk

Market risk is the risk that changes in market prices, such as foreign currency exchange rates, interest rates and other prices will affect the Group's financial position or cash flows.

25.6.1 Currency risk

The Group is exposed to currency risk on sales, purchases and borrowings that are denominated in a currency other than the respective functional currencies of Group entities. The currencies giving rise to this risk are primarily U.S. Dollar ("USD"), Singapore Dollar ("SGD"), Vietnam Dong ("VND") and Australian Dollar ("AUD").

Risk management objectives, policies and processes for managing the risk

Certain subsidiaries use forward exchange contracts to hedge its foreign currency risk, where necessary, the forward exchange contracts are rolled over at maturity at market rates.

Exposure to foreign currency risk

The Group's exposure to foreign currency risk, based on carrying amounts as at the end of the reporting period was:

| | USD | Denominated in | | AUD |
|-----------------------------|-----------------|----------------|----------------|--------------|
| | RM'000 | SGD | VND | RM'000 |

25.6 Market risk (continued)

25.6.1 Currency risk (continued)

Currency risk sensitivity analysis

A 10% (2014: 10%) strengthening of RM against the following currencies at the end of the reporting period would have increased/(decreased) post-tax profit or loss by amounts shown below. This analysis is based on foreign currency exchange rate variances that the Group considered to be reasonably possible at the end of the reporting period. The analysis assumes that all other variables, in particular interest rates, remained constant and ignores any impact of forecasted sales and purchases.

| | Equity | | Profit or loss | |
|-----|----------|----------|----------------|--------------|
| | 2015 | 2014 | 2015 | 2014 |
| | RM'000 | RM'000 | RM'000 | RM'000 |
| USD | - | - | 6,026 | 6,328 |
| SGD | - | - | 146 | 77 |
| VND | - | - | (131) | 349 |
| AUD | - | - | (46) | (173) |
| | <u>-</u> | <u>-</u> | <u>(46)</u> | <u>(173)</u> |

A 10% (2014: 10%) weakening of RM against the above currencies at the end of the reporting period would have had equal but opposite effect on the above currencies to the amounts shown above, on the basis that all other variables remained constant.

25.6.2 Interest rate risk

The Group's fixed rate borrowings are exposed to a risk of change in their fair values due to changes in interest rates. The Group's variable rate borrowings are exposed to a risk of change in cash flows due to changes in interest rates. Short-term receivables and payables are not significantly exposed to interest rate risk.

Exposure to interest rate risk

Interest rate risk sensitivity analysis

(a) Fair value sensitivity analysis for fixed rate instruments

The Group does not account for any fixed rate financial assets and liabilities at fair value through profit or loss, and the Group does not designate derivatives as hedging instruments under a fair value hedge accounting model. Therefore, a change in interest rates at the end of the reporting period would not affect profit or loss.

(b) Cash flow sensitivity analysis for variable rate instruments

A change of 100 basis points ("bp") in interest rates at the end of the reporting period would have (decreased)/increased profit or loss before tax by the amounts shown below. This analysis assumes that all other variables, in particular foreign currency rates, remain constant.

| | Profit or loss | | Profit or loss | |
|---------------------------|--------------------------------------|--------------------------------------|--------------------------------------|--------------------------------------|

25. Financial instruments (continued)**25.7 Hedging activities****25.7.1 Hedge of net investment in foreign operation**

In the previous year, the Group's Australian Dollar denominated secured revolving credit has been designated as a hedge of the Group's investment in its subsidiary in Australian. In the previous financial year, the loan had been fully repaid to its banker. The carrying amount of the loan as at the end of the reporting year is RM Nil (2014: Nil). A foreign exchange loss of RM Nil (2014: RM90,000) was recognised in other comprehensive income which comprises the loss arising from foreign currency risk between United States Dollar and Australian Dollar that is determined to be effective hedge, prior to the termination of the hedge.

25.8 Fair value of financial instruments

The carrying amounts of cash and cash equivalents, short-term receivables and payables and short-term borrowings reasonably approximate their fair values due to the relatively short-term nature of these financial instruments.

It was not practicable to estimate the fair value of the Group's investment in unquoted shares due to the lack of comparable quoted prices in an active market and the fair value cannot be reliably measured.

Financial instruments not carried at fair value

Submission for the Amended Investment License was made in December 2015 and although the issuance of the Amended Investment License by the lawful State Authority of Vietnam remains outstanding, the Company considers the transactions to be completed as at 31 December 2015 (“deemed date of disposal”) based on the accounting concept of “substance over form” as the issuance of the Amended Investment License is considered to be fundamentally administrative in nature. Hence, the disposal of 50% of TVP to DOFICO for a total cash consideration of USD1,630,000 (RM6,146,000), was recognized in the current financial year and resulted in a gain of RM2,052,000. 32. Asset classified as held for sale

During the year, a printing machine, which was owned by TVP was dismantled and packed for shipment for the future setting up of the Group's new operations in Middle East (Dubai) to supply to its new customers in Dubai. The aforesaid printing machine was disposed of by TVP to the Company for RM7,079,000 during the financial year and is recorded in the Company as an asset held for sale as management has already been actively acting to setup the Group's new operations in Dubai and the operation is expected to commence within 12 months.

Ltd ("TVP") and Dong Nai Food Industrial Corporation Vietnam ("DOFICO") vide sale of 50% of TVP to DOFICO for USD1,630,000 (RM6,146,000) to secure DOFICO print packaging volume. TVP has been recognised as a Jointly Controlled Entity of the Company as at 31 December 2015.

However, the legal completion of the Proposed Joint Venture shall take place on the date on which:

- all the condition precedents have been fulfilled to the satisfaction of the Company or waived by the Company; and
- an amended investment certificate has been issued by the lawful State Authority of Vietnam to TVP according to which TVP has been recognised as the joint venture limited liability company with two members and each of the Company and DOFICO holds 50% of the Charter Capital respectively.

The legal completion of the Proposed Joint Venture is pending the issuance of an amended investment certificate by the State Authority of Vietnam.

- (b) On 24 August 2015 the Company, had entered into a Memorandum of Understanding ("MOU") with Lum Chang Holdings Limited to jointly negotiate the terms of the proposed development of a mixed-use commercial development at No 9 & 11, Jalan Semangat, 46200 Petaling Jaya, Selangor Darul Ehsan under title no: 3674 and 3967, Lot 30 & 4, Section 13, Municipality of Petaling Jaya, Selangor Darul Ehsan, on land which is currently held by a subsidiary of the Company on a 99-year lease from the State Government of Selangor, Malaysia with a residue of approximately forty-four (44) years as of the date of this MOU. The proposed rights issue is expected to be completed by third quarter of 2016.
- (d) On 11 March 2016, the Company announced that it had on 8 March 2016, incorporated a new wholly owned subsidiary, Alliance Print Technologies FZE ("FZE") in Dubai, United Arab Emirates with a registered share capital of AED1,000,000 consist of one (1) share. A15. Fair value information

The carrying amounts of cash and cash equivalents, short term receivables and payables and short term borrowings reasonably approximate their fair values due to the relatively short term nature of these financial instruments.

The Group uses the following hierarchy in determining the fair value of all financial instruments at fair value:-

Level 1: Fair value is derived from quoted prices (unadjusted) in active markets for identical assets or liabilities.

Level 2: Fair value is estimated using inputs other than quoted prices included within Level 1 that are observable for the financial assets or liabilities, either directly or indirectly.

Level 3: Fair value is estimated using unobservable inputs for the financial assets and liabilities.

B. ADDITIONAL INFORMATION REQUIRED BY THE LISTING REQUIREMENTS OF BURSA MALAYSIA SECURITIES BERHAD**B1. Review of Performance****Current Quarter against Previous Year Corresponding Quarter****Revenue**

Group's revenue for the first quarter ended 31 March 2016 decreased by 5.8% or RM5.1 million to RM82.4 million from RM87.5 million in the preceding year corresponding quarter. This decrease was mainly due to change of pricing of some products to a major customer and the impact of a Vietnam subsidiary that was deconsolidated from 31 December 2015 as a subsidiary to a jointly controlled entity. The aforesaid impacts were mitigated by sales to a new multinational tobacco company customer.

Profit before tax

Profit before tax of RM6.6 million for the first quarter ended 31 March 2016 was higher by RM5.4 million as compared to the preceding year corresponding quarter of RM1.2 million.

The improvements was mainly due to the strengthening of the USD, significant improvement in productivity and waste reduction as well as the absence of redundancy expense of RM6.9m which was incurred in Q1 2015 as a result of the restructuring of the production footprint within the Group to improve strategic positioning to service the customers and reduce operating costs over the longer term.

B2. Variation of Results against Preceding Quarter

Group's revenue for current quarter under review decreased by RM14.7 million or 15.1% to RM82.4 million from RM97.1 million.

Profit before tax was at RM6.6 million as compared to RM12.9 million for the preceding quarter, a decreased of RM6.3 million or 48.8%, mainly due to lower sales and the absence of a one-off gain of RM2.1 million on disposal of 50% in TVP.

B3. Prospects

Based on the current year-to-date results under review, the Directors are of the opinion that the outlook for 2016 continues to be competitive in the volatile global environment. Besides efficiency improvement, wastage control and active cost containments, the Group is continuing to develop new opportunities which would lead to volume growth from new customers in other geographical segments and existing customers.

B4. Profit Forecast

None.
