#### A8. Operating Segments

Management has determined segments based on how information is reported to the Group's chief operating decision maker for the purposes of resource allocation and operating performance review.

The Group's reportable segment is determined based on geographic regions, serving mainly customers from two principal markets. For companies within the same segment, the printing business and trading activities are inter-twined and all purchases for the trading activities are from companies within the Group.

Other non-reportable segments comprise operations related to investment holdings and investment property holding.

Performance is measured based on segment profit before tax, interest, depreciation and amortisation, as included in the internal management reports that are reviewed by the Board of Directors. Segment profit is used to measure performance as management believes that such information is the most relevant in evaluating the results of segment relative to other entities that operate within these industries.
