B. Additional Information As Required by Appendix 9B of Bursa Malaysia Listing Requirements

B1. Review of Performance

The Group's revenue increased to RM273.1 million for the current financial year from RM269.6 million for the last corresponding financial year. The increase was mainly due to higher CPO sales volume. The Group's profit after tax decreased to RM29.5 million for the financial year from RM33.2 million in the last corresponding financial year. The decrease was mainly due to higher cost of production compared to last corresponding financial year.

The Group's revenue decreased to RM78.9 million in the current quarter from RM81.1 million for the preceding year's corresponding quarter mainly due to lower CPO and PK prices by 4% and 27% respectively. The Group reported a profit after tax of RM0.8 million as compared to preceding year's corresponding quarter profit after tax of RM9.7 million. The lower profit in the current quarter was mainly due to:

- a.) Decrease in FFB production by 31%;
- b.) Increase in estate operating costs by RM1.7 million, mainly comprised of fertilizer and infrastructure costs; and
- c.) Realization of high FFA CPO stock at price lower than the market during the current quarter.

B2. Material changes in profit before taxation for the current quarter as compared with the immediate preceding quarter

The Group recorded a profit before taxation of RM1.5 million for the current quarter as compared to profit before taxation of RM6.07 million in the immediate preceding quarter. The lower profit before taxation for the current quarter compared to the immediate preceding quarter was mainly due to:

- a.) Increase in estate operating costs by RM2.3 million, mainly comprised of fertilizer and infrastructure costs; and
- b.) Realization of high FFA CPO stock at price lower than the market during the current quarter.

B3. Prospects

The demand for vegetable oils will continue to be positive with the increasing world population. However, downside risk arising from the prolonged and expanded Eurozone debt crisis may exert downward pressure on the demand for vegetable oils globally, inevitably affecting prices. In addition to the adverse effect of labour scarcity, the industry will also experience cost pressures arising from the introduction of minimum wages with effect from 1st January 2013 and rising input costs of fertilisers and fuel.

However, FFB production is expected to increase from the 4th Quarter of the Financial Year 2012 due to the recovery in the biological yield cycle.

Notwithstanding the volatility of the commodity prices, the performance of the Group for the next financial year is expected to be satisfactory.

B4. Variance of actual profit from forecast profit / profit guarantee

Not applicable as no profit forecast or profit guarantee was published.
