

HARN LEN CORPORATION BHD (“Harn Len” or “the Company”) (502606-H)

EXPLANATORY NOTES TO THE FOURTH QUARTER INTERIM FINANCIAL REPORT FOR THE PERIOD ENDED 31 DECEMBER 2019.

PART A: EXPLANATORY NOTES AS PER MFRS 134

A1 Basis of preparation

The unaudited condensed interim financial statements have been prepared in accordance with the requirements of Malaysia Financial Reporting Standard (“MFRS”) 134, Interim Financial Reporting and the applicable disclosure provisions of the Listing Requirements of Bursa Malaysia Securities Berhad (“Bursa Malaysia”). The report should be read in conjunction with the audited financial statements for the financial year ended 31 December 2018.

A2 Significant Accounting Policies

The accounting policies, presentation and methods of computation adopted for the unaudited condensed interim financial statements are consistent with those adopted for the audited financial statements for the financial year ended 31 December 2018 except for the adoption of new MFRSs, amendments to published standards and IC Interpretations for the Group for the financial year beginning 1 January 2019:

MFRS 16	Leases
Amendments to MFRS 9	Prepayment Features with Negative Compensation
Amendments to MFRS119	Plan Amendment, Curtailment or Settlement
Amendments to MFRS128	Long-term Interest in Associates and Joint Ventures
IC Interpretation 23	Uncertainty over Income Tax Treatments
Amendments to MFRSs	Annual Improvements to MFRSs 2015-2017 Cycle

The adoption of the above MFRSs, amendments to published standards and IC Interpretations do not have any material impact on the unaudited condensed interim financial statements of the Group except for the following:

Adoption of MFRS 16: Leases

MFRS 16 provides a comprehensive model for the identification of lease arrangements and their treatment in the financial statements for both lessors and lessees. MFRS 16 supersede the MFRS 117 *Lease* and the related IC Int. The Group has adopted MFRS 16 retrospectively from 1 January 2019 using the simplified transition approach and has not restated comparatives for the 2018 reporting period as permitted under the standard. The reclassifications and adjustments arising from the new leasing rules are therefore recognized in the opening balance of the financial position as at 1 January 2019.

The Group make use of the practical expedient available on transition to MFRS 16 not to reassess whether a contract is or contain a lease. Accordingly, the definition of a lease in accordance with MFRS 117 and IC Interpretation continue to apply to those leases entered or modified before 1 January 2019.

HARN LEN CORPORATION BHD (“Harn Len” or “the Company”) (502606-H)

EXPLANATORY NOTES TO THE FOURTH QUARTER INTERIM FINANCIAL REPORT FOR THE PERIOD ENDED 31 DECEMBER 2019.

The change in definition of a lease mainly relates to the concept of control. MFRS16 distinguishes between leases and service contracts on the basis of whether the use of an identified assets is controlled by the customer. Control is considered to exist if the customer has:

- The right to obtain substantially all of the economic benefits from the use of an identified assets; and
- The right to direct the use of that asset.

The impact of the adoption of MFRS16 on operating lease and finance lease are as follows:

Operating leases

In applying MFRS 16, the Group

- Recognize right-of-use assets and lease liabilities in the statement of financial position, initial measured at the present value of the future lease payments;
- Recognize depreciation of right-of-use assets and interest on lease liabilities in the statement of profit or loss; and
- Separate the total amount of cash paid into principal portion (presented within financing activities) and interest (presented within operating activities) in the statement of cash flows

Lease incentive (eg. Rent-free period) is recognized as part of the measurement of the right-of-use assets and lease liabilities. Right-of-use is tested for impairment in accordance with MFRS 136 *Impairment of Assets* which replace the previous requirement to recognize a provision for onerous lease contracts.

For short term lease (lease term of 12 months or less) and leases of low value assets (such as personal computers and office furnitures), the Group opt to recognize a lease expense on straight line basis as permitted by MFRS 16.

Finance leases

The Group recognize the carrying amount of the lease assets immediately before transition as the carrying amount of the right-of-use assets on the date of initial application. Equipment previously included in property plant and equipment and leasehold land use right are presented as right-of-use and the lease liability, previously presented within borrowing and amount owing to affiliated companies, is presented in a separate line for lease liabilities. The measurement principles of MFRS 16 are then applied after that date.

Part B: Additional Information Required Pursuant to Part A of Appendix 9B of the Listing Requirements of Bursa Malaysia Securities Berhad.

B1 Review of performance

For the 12 months ended 31 December 2019, the Group generated total revenue of RM116,901,095 (2018: RM185,732,150). The plantation operations contributed RM113,713,853 or 97%, (2018: RM178,084,624 or 96%). The property divisions contributed RM3,187,242 or 3%, (2018: RM7,647,526 or 4%). The operating loss was primarily due to lower CPO and PK price coupled with lower sales volume of CPO and PK during the period.

Plantation operations

The following are the production and sales for the period ended 31 December 2019:

	31-Dec-19	31-Dec-18
	<u>MT</u>	<u>MT</u>
FFB produced	159,811	180,023
FFB processed	221,549	321,912
CPO produced	47,102	66,615
PK produced	9,521	14,424
CPO sold	47,007	68,009
PK sold	9,618	14,255

The average selling price of CPO was RM2,040 per m/t (2018: RM2,257 per m/t), FFB was RM358 per m/t (2018: RM379 per m/t) and for PK, it was RM1,139 per m/t (2018: RM 1,706 per m/t).

Property and hotel operations

The property operation, especially the hotel division, remained lackluster for the period to date due to intense competition created by the numerous new boutique hotels that charge very competitive rates within the city area and increasing preference of traveler choosing hotels in area near Iskandar Malaysia zone for business and leisure purpose.

The Company has ceased its loss-making hotel operations on 28 February 2019 and the hotel floors were leased out to a hotel operator in Q3 2019.

EXPLANATORY NOTES TO THE FOURTH QUARTER INTERIM FINANCIAL REPORT FOR THE PERIOD ENDED 31 DECEMBER 2019.

B2 Comparison of results against preceding quarter

	Quarter to 31-Dec-2019 RM	Quarter to 30-Sep-2019 RM	% change
Revenue	43,059,025	30,227,527	42%
Profit (loss) from operating activities	(1,496,418)	(3,394,150)	-56%

	Quarter to 31-Dec-2019 MT	Quarter to 30-Sep-2019 MT	% change
FFB processed	69,403	63,724	9%
CPO produced	14,750	13,075	13%
PK produced	2,897	2,660	9%
CPO sold (m/t)	15,189	12,444	22%
PK sold (m/t)	3,280	2,336	40%

<i>Average selling price:</i>	RM/mt	RM/mt	
CPO	2,248	1,991	13%
PK	1,177	1,075	9%

The revenue generated in the current quarter was 42% higher than revenue achieved in the preceding quarter mainly due higher production and sales volume of FFB, CPO and PK during peak crop season coupled with improvement in average selling price of CPO & PK. Loss from operations was mainly due to lower production and sales volume to breakeven despite significant improvement vs Q3 2019 and also a one off RM1.6m retrenchment benefit recorded in relation to an estate and oil mill disposal. 69,403 m/t of FFB was processed compared to 63,724 m/t for the preceding quarter. 14,750 m/t of CPO and 2,897 m/t of PK were produced, compared to 13,075 m/t of CPO and 2,660 m/t of PK respectively in the preceding quarter. A total of 15,189 m/t of CPO were sold at an average selling price of RM2,248 per m/t compared to 12,444 m/t at RM1,991 per m/t. A total of 3,280 m/t of PK were sold at an average selling price of RM1,177 per m/t compared to 2,336 m/t at RM1,075 per m/t.

B3 Current year prospects

CPO price is currently hovering between RM2,500 to RM2,700 per m/t. It is expected to hold moving into Q2 2020 with the biodiesel initiatives from Malaysia and Indonesia government and the beginning of low crops season. CPO price is forecasted to an average between RM2,400 to RM2,500 per m/t for year 2020. The Group strongly believe that year 2020 CPO price will be above 2019 average of RM2,119 per m/t.

The plantation operations are still facing manpower problem due to shortage of workers. Continuous recruitment activities are ongoing despite the worker shortage issue remain the key

challenge for the industry. On the other hand, corrective actions have also been under-taken to improve crop yield from the fields and crop quality in order to improve CPO and PK extraction rates.

The property operations, especially the hotel division, continue to face difficult times. The Company has ceased its loss-making hotel operations on 28 February 2019 and the hotel floors were leased out to a hotel operator in Q3 2019. Efforts are continuing in disposing off non-core assets to interested parties.
