Additional Information Required By The BMSB - Listing Requirements

B1 A detailed analysis of performance of operating segments of the Group, setting out material factors affecting the earnings and/or revenue of each segment for the current quarter and financial year-to-date

Current quarter compared to the preceding year's corresponding quarter

For the current quarter under review, the Group recorded higher revenue and pre-tax profit of RM 69 million and RM 15 million as compared to RM 63 million and RM 13 million, respectively of the corresponding quarter of the preceding year. The increase in the Group's trading profit was mainly contributed by the following divisions :

(i) MLM division

Despite an increase in revenue by about 16%, pre-tax profit has only increased marginally by about 5% as compared to the corresponding quarter of the preceding year, mainly due to higher product and operating costs.

(ii) Wholesale division

The trading profit improved by almost double to about RM 6.6 million as compared to the preceding year's corresponding quarter. The increase in pre-tax profit was mainly derived from the increase in inter-segment sales and better sales of patented medicine products.

(iii) Retail division

The pre-tax profit dropped by about 80% in the third quarter as compared to the preceding year's corresponding quarter. The Chinese New Year ("CNY") festive season fell in the fourth quarter of current financial year, as compared to last year, which fell in the third quarter of the last financial year. Therefore, bulk of the sales generated from the festive season will only be recorded in the fourth quarter of this financial year. Moreover, the division has invested heavily in advertising & promotion ("A&P") prior to the CNY festival coupled with higher operating costs and hence, a much reduced net profit.

Current financial period compared to the preceding year's corresponding period

For the nine months period ended 31 January 2013, the Group achieved higher revenue and pre-tax profit of RM 196 million and RM 49 million, as compared to the preceding year's corresponding period of RM 170 million and RM 35 million respectively:

(i) MLM division

This division has achieved higher revenue and pre-tax profit of about RM 121 million and RM 22 million, as compared to RM 95 million and RM 17 million in the preceding year, an increase by about 27% and 29% respectively. This division has contributed about 62% and 44% towards the total revenue and pre-tax profit for the Group.

The increase in revenue was mainly derived from higher sales of foundation garments, series of health food and wellness products. In addition, one of the newly launched products during the period has received good response from the market and has contributed about 5% to the total revenue of the division. The revenue from food and beverage consumable products had increased by more than three fold as compared to previous year. Furthermore, growth in membership by about 27% was also one of the main driver for the increase in turnover and bottom line.

(ii) Wholesale division

The increase in external revenue in the wholesale division by about 6%, mainly attributable to higher sales of Chinese health food, Chinese medicated tonic and patented medicine products as a result of higher stock order from medical halls and the increase in the inter-segment sales of 37% have both contributed to the bulk of the additional pre-tax profit of the division.

(iii) Retail division

Revenue and pre-tax profit decreased by about 9% and 40% respectively. As mentioned above, bulk of the sales generated from the CNY festive season will only be recorded in the fourth quarter of the current financial year. Stiff competition among retailers and cautious consumers spending are the biggest challenges for the division to increase its revenue. Higher A&P costs spent prior to CNY festive season coupled with higher operating costs had further lowered the net profit.

(iv) Other division

Other division is inclusive of manufacturing division, advertising services and property investment division. The pre-tax profit increase by about RM 5 million mainly derived from the gain on disposal of one freehold vacant land which had contributed about RM 4.8 million to the Group's profit. Other incremental in profit was generated from the manufacturing division and advertising services coupled with one-off compensation amounting to RM 570,000, as a result of the early termination of a sales contract by one of its customers in the manufacturing division.

B2 Material changes for the current quarter as compared with the immediate preceding quarter

For the third quarter under review, the Group recorded higher revenue and pre-tax profit of RM 69 million and RM 15 million as compared to RM 66 million and RM 20 million respectively of the immediate preceding quarter, mainly attributable to the following divisions:

Wholesale division -- Revenue and pre-tax profit increase by about 31% and 16%, respectively. The better performance in this division was mainly contributed by higher sales in the Chinese medicated tonic and increase in the inter-segment sales.

Retail division -- Despite that sales was maintainable in Q3 as compared to Q2, pre-tax profit was downed by about RM 1.1 million, mainly due to extensive A&P incurred pre CNY festive season and higher operating costs.

Other division -- The pre-tax profit decrease by about RM 5.8 million as compared with that of the immediate preceding quarter, which was mainly due to higher operating cost in the manufacturing and advertising divisions. The immediate preceding quarter had recorded higher profit which was mainly generated from the gain on disposal of one freehold vacant land amounting to RM 4.8 million and higher dividend received.

B3 Commentary on prospects

The Group is optimistic that it will work towards its internal targeted results amidst stiff competition. The MLM division will continue to provide training and development to its distributors and growth in membership base are some of the strategies to capture a bigger market share. Moreover, with an effective sales campaign in place and more new products in the pipeline, going forward the MLM division will be able to sustain its growth momentum. Whereas the wholesale and retail divisions will continue to implement effective A&P programme, by introducing more health awareness programme to the public.

With the various measures being implemented by the Group, the Board of Directors is of the opinion that the prospect of the Group will remain profitable in the next quarter.

B4 Profit Forecast

There is no profit forecast.

B5 Taxation

The provision for income tax is based on the business income earned for the period under review.

For the current quarter, the effective tax rate of the Group is higher than the statutory tax rate due mainly to certain expenses which are not deductible for tax purpose and losses of certain subsidiary companies which cannot be set off against profits of certain subsidiaries as no Group relief is available for tax purposes.

For the current year to date, the effective tax rate of the Group is lower than the statutory tax rate due mainly to certain income which are not subject to tax and the utilisation of capital allowance.
