13. Review of performance of the Company and principal subsidiaries, setting-out material factors affecting earnings and/or revenue of the Company and Group for the financial year-to-date

The current quarter revenue for period ended 31 December 2023 amounted to RM51.5 million, which was RM4.6 million or 9.7% higher than RM47.0 million for the same quarter last year. However, the Group recorded a pre-tax profit of RM2.1 million as compared to a pre-tax profit of RM2.9 million for the same period of the preceding year. This is due to higher product costs, increase in sales related operating costs and minimum wages compare to the same quarter last year.

The revenue for the 9 months period ended 31 December 2023 amounted to RM147.2 million, which was RM6.1 million or 4.3% higher than RM141.1 million for the corresponding 9 months period last year. For the current 9 months period, the Group recorded a pre-tax profit amounting to RM9.2 million as compared to a pre-tax profit of RM14.6 million for the corresponding 9 months period last year. This was due to the same reason as above.

14. Comparison with preceding quarter's results

The Group experienced an increase in revenue of RM6.7 million for the current quarter ended 31 December 2023 to RM51.5 million as compared to RM44.8 million in the preceding quarter ended 30 September 2023. The current quarter was aided by festival sales.

However, the Group recorded a slightly lower pre-tax profit of RM2.1 million for the current quarter ended 31 December 2023 as compared to the pre-tax profit of RM2.5 million recorded for the quarter ended 30 September 2023. This was due to the same reason as above.

15. Current year prospects

Growth in 2023 was moderate as the Group navigated in a landscape where cost pressures such as product costs, logistic costs and the increase in minimum wage have impacted profit margins. Reduced average household income and increasing cost of living have impacted the amount of products purchase. 2024 is expected to be the same with high inflation, coupled with expected hikes in utility tariffs as well as the impending subsidy rationalisation and the increase in the sales and service tax from 6% to 8%, may result in subdued consumer spending for the year.

However, with agility and resilience, the Group can maintain its competitive advantage and remained the preferred brands for quality and value.
