The interim financial report has been prepared in accordance with the same accounting policies adopted in the 2009 annual financial statements.

The preparation of an interim financial report in conformity with FRS 134 Interim Financial Reporting requires management to make judgments, estimates and assumptions that affect the application of policies and reported amounts of assets and liabilities, income and expenses on a year to date basis. Actual results may differ from these estimates.

This interim financial report contains condensed consolidated financial statements and selected explanatory notes. The notes include an explanation of events and transactions that are significant to an understanding of the changes in financial position and performance of the Group since the 2009 annual financial statements. 19 Financial Instruments With off Balance Sheet Risk

The Group does not have any off balance sheet financial instruments as at 14 May 2010, being the latest practicable date which is not earlier than 7 days from the date of issue of this quarterly report except for the forward foreign exchange contracts which have been entered into by the Group to hedge its foreign currency payable as follows -

				Contract Period		Outstanding Cor	ntract Amount
<u>Currency</u>	<u>Contract</u> <u>Amount</u> USD'000	Contract Date	Contract Type	From	То	USD'000	RM'000
USD	130.15	17/05/2010	Forward: Fixed Dated	17/05/2010	17/05/2010	130.15	414.78
	130.15					130.15	414.78

The Group does not foresee any significant credit and market risks associated with the above forward exchange contracts as they are entered into with approved financial institutions and the Directors are of the view that the possibility of non-performance by these financial institutions is unlikely on the basis of their respective creditworthiness and financial strength.

There is no cash requirement for the above forward foreign exchange contract.

Transactions in foreign currencies are converted into Ringgit Malaysia at rates of exchange ruling at the transaction dates. Monetary assets and liabilities denominated in foreign currencies at the balance sheet date are translated into Ringgit Malaysia at the rates of exchange ruling at that date, except when there are related or matching forward exchange contracts in respect of trading transactions, in which case, the contracted rates of exchange are used. All exchange gains and losses arising on foreign currency transactions and translation are recognised in the income statement.

20 Pending Litigation

There is no pending material litigation at the date of issue of this interim financial report.

21 Material Changes in the Profit Before Taxation for Quarter Reported on as Compared With the Immediate Preceding Quarter

	Current Year Quarter	Immediate Preceding Quarter	Increase / (Decrease)
	31-Mar-10	31-Dec-09	
	RM '000	RM '000	RM '000
Revenue	40,692	43,199	(2,507)
Profit/(Loss) before taxation	2,036	4,555	(2,519)
Profit/(Loss) before taxation - %	5%	11%	

The drop in Group revenue for the current quarter was attributed to the lower volume in Vietnam, as a result of shorter business days and slower market activities arising from shorter calendar days and longer festive season holidays there. On the other hand, profit has contracted because of lower overall business volume for the Group and significant escalating paper material prices that increased the cost of production. Such cost increase normally takes some times before it can be passed on to the customers through selling price increase.

22 Review of the Performance of the Company and its Principal Subsidiaries (Current Year-to-Date vs. Preceding Year Corresponding Period)

	Current Year-to-date	Preceding Year Corresponding Period	Increase / (Decrease)
	31-Mar-10	31-Mar-09	
	RM '000	RM '000	RM '000
Revenue	83,891	70,938	12,953
Profit before taxation	6,591	4,104	2,487
Profit before taxation - %	8%	6%	

Group revenue in the preceding year corresponding period was adversely affected by the financial crisis prevailing during that period. As a result, Group profitability has dropped on reduced volume and margin, and was further aggravated by the high currency exchange losses suffered on depreciation of Vietnam Dong during the that period.

For the current year to date, Group revenue and profitability are back on track as economic recovery took place and continued on. The Group exposure to foreign currency risk has been closely monitored and controlled and was effectively eliminated as the management takes on aggressive but prudent approach in managing the risk.

23 Current Year Prospects

Global economic recovery continues to gather steam and gaining strength, with China and countries in the Asia Pacific region at the helm

In Vietnam, the government forecasted that the country's GDP will grow by 6.5% in 2010, better than the 5.3% growth in 2009. International Monetary Fund (IMF) shared the view with a forecast of 6% growth for Vietnam in its World Economic Outlook (WEO) report published in April 2010.

In Malaysia, the Malaysian Institute of Economic Research (MIER) expects the country to turnaround to register a GDP growth of 5.2% in 2010, from a 1.7% contraction in 2009. Similarly, IMF views Malaysia's economy favourably and has given a forecast of 4.7% GDP growth for Malaysia in its' April 2010 WEO report.

Corrugated Carton Manufacturing

We expect our businesses in the corrugated carton industry to continue to grow in both output and revenue in line with better market prospect, supported by the additional production capacity that we have installed (through construction of new factory building, additions of new high-tech machineries and upgrade of production facilities), as well as those that are coming on board from capital expenditures (Capex) that are in progress and in the pipeline - approximately RM8 million invested in Financial Year 2009, RM10 million in this Financial Year 2010, and another RM8 million in Financial Year 2011.

Growth in our Vietnam operation is expected to continue to surpass that in Malaysia, and will contribute substantially to the Group's revenue and profitability.

Property Development

We felt that the current investment setting for property market in Penang is still not favourable and attractive for us to venture into with new project, but we will continue to monitor and seize any opportunity to broaden our property land bank both in Penang vicinity and other places in preparation for our future ventures in this business segment.

Future Outlook

In our last financial year 2009, when the global economic condition was at its worst during the world financial crisis, our Group has still managed to sustain the earning growth, registering a 9% higher pre-tax profit as compared to that in financial year 2008.

For the first half of this financial year, we continued to do better, with 18% growth in revenue and a stunning 60% higher pre-tax profit as compared to that in the preceding year corresponding period.

Moving forward, with better and higher production capacity coming on board through the current expansion program, and on the back of growing market, we are indeed very optimistic of another good performance in the current financial year. Barring unforeseen circumstances, we expect the Group's revenue and profitability in Financial Year 2010 to be better than that in financial year 2009.
