This interim financial report is unaudited and has been prepared in accordance with the applicable disclosure provisions of the Listing Requirements of the Bursa Malaysia Securities Berhad, including compliance with Financial Reporting Standard (FRS) 134 Interim Financial Reporting, issued by the Malaysian Accounting Standards Board (MASB)

The interim financial report has been prepared in accordance with the same accounting policies adopted in the 2009 annual financial statements.

The preparation of an interim financial report in conformity with FRS 134 Interim Financial Reporting requires management to make judgments, estimates and assumptions that affect the application of policies and reported amounts of assets and liabilities, income and expenses on a year to date basis. Actual results may differ from these estimates.

The notes include an explanation of events and transactions that are significant to an understanding of the changes in financial position and performance of the Group since the 2009 annual financial statements. The condensed consolidated interim financial statements and notes thereon do not include all of the information required for full set of financial statements prepared in accordance with FRSs.

The financial information relating to the financial year ended 30 September 2009 that is included in the interim financial report as being previously reported information does not constitute the Company's statutory financial statements for that financial year but is derived from those financial statements other than those that have been restated as a result of the change in accounting policies. FRS 101 (revised in 2009), which supersedes FRS 101 *Presentation of Financial Statements* (revised in 2005), affects the presentation of owner changes in equity and comprehensive income. It requires an entity to present all owner changes in equity in a statement of changes in equity. All non-owner changes in equity (i.e. comprehensive income) are required to be presented in one statement of comprehensive income or two statements (a separate income statement and a statement of comprehensive income). FRS 101 (revised in 2009) also changes the titles of the financial statements to reflect their function more closely, for example, the titles "balance sheet" and "cash flow statement" are renamed as "statement of financial position" and "statement of cash flows" respectively.

Slightly higher Group revenue for the current quarter was attributed to combination of marginally increased sales volume and average selling prices. Average selling prices is trending higher, albeit marginally and slowly, succeeding increase in paper costs.

Loss incurred for the current quarter was mainly because of year end provisions made on doubtful debts as well as loss on disposal of investment property / leasehold land in subsidiaries. Operating profit in the packaging division continued to be thin on continue escalating paper material and consumable prices. Though average selling prices have been adjusted upward slowly, the quantum and speed of such adjustments were lagging behind that of the material cost increase, resulting in significant dip in profit margin. Further more, financial costs have also increased substantially during this quarter on higher borrowing costs charged by the banks.

## 22 Review of the Performance of the Company and its Principal Subsidiaries (Current Year-to-Date vs. Preceding Year Corresponding Period)

Preceding Year Current Increase / Corresponding Year-to-date (Decrease) Period 30-Sep-10 30-Sep-09 RM '000 RM '000 RM '000 168,874 146,212 22.662 6,378 12,774 (6,396)

Revenue
Profit before taxation
Profit before taxation - %

Higher group revenue in this current financial year was mainly due to higher sales volume coupled with higher average selling prices as compared to that of last financial year. Noticeably, Group revenue in the last financial year was low because of contracting market activities during the financial crisis prevailing at that period.

Despite higher revenue achieved, Group profit for the current year was only half of that achieved in last financial year, principally due to rising production costs and overheads that significantly eroded the profit margin. The inability to pass on these costs increase to the customers in the same quantum and as rapidly as it incurred have resulted in increase in production costs that ate into profit margin of the Group. Expanding capital expenditures and upgrade of production capacities have also attracted higher borrowing costs as well as higher depreciation charge that further reduced the Group's profitability.

#### 23 Current Year Prospects

Global economic recovery continues but with different paces and prospects for different regions, with Asian countries still having the more prominent and promising growth.

Both Malaysia and Vietnam have registered better economic growth so far this year as compared to last year, as evidenced by the various economy data released so far. Nevertheless, many indicators have emerged lately pointing towards possible slower growth ahead.

#### Corrugated Carton Manufacturing

Performance in the current year has not been as good as we have previously expected, despite having higher business volume. Our Group's profitability have dwindled significantly in particular since beginning of year 2010 when paper prices started to move up substantially, rapidly and continuously throughout the remaining financial year, that we were unable to pass on the cost increase in the same quantum to the customers on a timely manner. Though we have seen some upward adjustment of selling prices, the increase is disproportionately lower than the rapid increase in cost, thus affecting the overall profitability of the Group.

The additional capital expenditure that the Group continued to incur under its business expansion plan since the last quarter of previous financial year have necessitated increase in borrowings. This has further reduced the Group's profit because of higher financial expenses and depreciation charges.

Despite all these challenges and unfavourable conditions, the Group's financial and operating fundamentals are still intact. Growth in our Vietnam operation is expected to continue and surpass that in Malaysia, and will contribute proportionately to the Group's revenue and profitability.

#### Property Development

At the current juncture, we are still sceptical on the prospect of this business segment and have yet to feel comfortable to launch new project, but we will continue to monitor and seize any opportunity to broaden our property land bank both in Penang vicinity and other places in preparation for our future ventures in this business segment.

#### Future Outlook

Selling price increase is slowly catching up on cost increase, whilst paper costs are starting to stabilise. This augers well for the Group. Moving forward, we expect the earlier difficult operating conditions to ease and the Group's growth in revenue and profitability will pick up again. On the back of these expectations, barring unforeseen circumstances, we anticipate that the Group's performance in the following financial year will be better than that in the financial year 2010
