IC Interpretation 18	Transfers of Assets from Customers

*Effective for financial periods beginning on or after 1 January 2012:*

IC Interpretation 15	Agreements for the Construction of Real Estate
----------------------	--

The FRSs which are effective and have significant impact on the financial statements of the Group are:

a) FRS 8 Operating Segments

The Group applied this standard from financial period 1 September 2009. As this is a disclosure standard, there is no impact on the financial position or results of the Group. This new standard requires a ‘management approach’, under which segment information is presented on the same bases as that used for internal reporting purposes.

b) FRS 101 Presentation of Financial Statements

The new FRS 101 requires owner and non-owner changes in equity to be presented separately. The statement of changes in equity will include only details of transactions with owners, with all non-owner changes in equity presented as a single line item. In addition, the revised standard introduces the statement of comprehensive income: it presents all items of income and expense recognized in profit or loss, together with all other items of recognized income and expense, either in one single statement, or in two linked statements.

This is a disclosure standard with no impact on the financial position or financial performance of the Company and the Group.

c) FRS 117 Leases

Prior to the adoption of the Amendment to FRS 117, leasehold land that normally had an indefinite economic life and where title was not expected to pass to the lessee by end of the lease term was treated as an operating lease. The payment made on entering into or acquiring a leasehold land was accounted for as prepaid land lease payment that were amortised over the lease term in accordance with the pattern of benefit provided.

Upon the adoption of the Amendment to FRS 117 in relation to classification of lease of land, the Group reassessed the classification of a leasehold land as a finance lease or an operating lease based on the extend of risks and rewards associated with the land. The Group has determined that certain leasehold land of the Group are in substance finance leases and has reclassified those leasehold land from “Prepaid land lease payments” to “Property, plant and equipment”.

The reclassification has been made retrospectively in accordance with the transitional provision and does not affect the results of the Group.

The effects of the reclassification to the comparatives following the adoption of the Amendments to FRS 117 are as follows:

	As previously reported RM'000	Effects of Amendment to FRS 117 RM'000	As restated RM'000
Property, plant and equipment	26,910	14,585	41,495
Prepaid land lease payments	14,585	(14,585)	0

The change in accounting policies due to adoption of amendments to FRS 117 has no effect on the profit for the current quarter.

d) FRS 139 Financial Instruments: Recognition and Measurement

FRS 139 establishes principles for recognizing and measuring financial assets, financial liabilities and some contracts to buy and sell non-financial items. Depending on the categorization applied for each individual financial asset and liability, some financial assets and liabilities will need to be fair valued and others are stated at amortized cost. FRS 139 prescribes prospective application for the first time adoption. Significant policies adopted are summarized below:

Financial Assets

Financial assets are recognized in the statement of financial position when and only when the Group becomes a party to the contractual provisions of the instruments. Financial assets are derecognized if the Group's contractual rights to the cash flow from the financial assets expired or if the Group transfers the financial assets to another party without retaining control or substantially all risks and rewards of the assets.

*Initial recognition*

Financial assets within the scope of FRS 139 are classified as financial assets at fair value through profit and loss, loans and receivables, held-to-maturity investments, available-for-sale financial assets or as derivatives as hedging instruments in an effective hedge, as appropriate. The group determines the classification of its financial assets at initial recognition.

Financial assets are recognized initially at fair value plus, in the case of financial assets not at fair value through profit or loss, transaction costs that are directly attributable to the acquisition of the financial assets.

Purchase or sales of financial assets that require delivery of asset within a time frame established by regulation or convention in the market place (regular way purchase) are recognized on the trade date i.e. date the Group commits to purchase or sell the assets.

#### *Subsequent measurement*

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in active market. Such financial assets are carried at amortized cost using the effective interest rate method less impairment losses. Gain and losses are recognized in the income statement when the loans and receivables are derecognized or impaired, as well as through the amortization process.

#### *Impairment of financial assets*

FRS 139 requires the Group to assess at each statement of financial position date, whether there is any objective evidence that a financial asset or group of financial assets is impaired.

A financial asset or group of financial assets is deemed to be impaired if, and only if there is objective evidence of impairment as a result of one or more events that has occurred after the initial recognition of the asset (an incurred "loss event") and that loss event has an impact on the estimated future cash flows of the financial assets or the group of financial assets that can be reliably estimated.

#### Financial Liabilities

Financial liabilities are recognized in the statement of financial position when and only when the Group becomes a party to the contractual provision of the instrument. Financial liabilities are derecognized if the Group's obligations specified in the contract expired or are discharged or cancelled.

#### *Initial Recognition*

Financial liabilities within the scope of FRS 139 are classified as financial liabilities at fair value through profit and loss, loans and borrowings or as derivatives designated as hedging instruments in an effective hedge, as appropriate. The Group determined the classifications of its financial liabilities at initial recognition.

Financial liabilities are recognized initially at fair value plus, and in the case of loans and borrowings, directly attributable transaction costs. The Group's financial liabilities include trade and other payable and financial guarantees. All financial liabilities of the Group are classified as loans and borrowings.

#### *Subsequent measurement*

After initial recognition, interest bearing loans and borrowings are subsequently measured at amortized cost using the effective rate method. Gains and losses are recognized in the statement of comprehensive income when the liabilities are derecognized as well as through amortization process.

In accordance with the transitional provision of FRS 139, the impact of FRS 139 is accounted prospectively with adjustments to be made to the opening balances in the statement of financial position. Comparative figures need not be adjusted.

The adoption of FRS 139 has no effects on the opening balance in the consolidated statement of financial position as at 1 September 2010.
