**MFRSs and/or IC Interpretations (Including the Consequential Amendments)**

## NOTES TO THE INTERIM FINANCIAL STATEMENTS FOR THE THIRD QUARTER ENDED 31 MARCH 2019

### PART A - EXPLANATORY NOTES PURSUANT TO MFRS 134 (CONT'D)

#### A2. SIGNIFICANT ACCOUNTING POLICIES (CONT'D)

The Group has not applied in advance the following accounting standards and/or interpretations (including the consequential amendments, if any) that have been issued by the Malaysian Accounting Standards Board ("MASB") but are not yet effective for the current financial year :- (cont'd)

Amendments to MFRS 10 : Consolidated Financial Statements and MFRS 128: Sale or Contribution of Assets between an Investor and its Associate or Joint Venture	Deferred
Amendments to MFRS 128 : Long Term interests in Associates and Joint Ventures	1 January 2019
Amendments to MFRS 3 : Annual Improvement to MFRS Standards 2015-2017 Cycle	1 January 2019
Amendments to MFRS 11 : Annual Improvement to MFRS Standards 2015-2017 Cycle	1 January 2019
Amendments to MFRS 112 : Annual Improvement to MFRS Standards 2015-2017 Cycle	1 January 2019
Amendments to MFRS 123 : Annual Improvement to MFRS Standards 2015-2017 Cycle	1 January 2019

The adoption of the above accounting standards and/or interpretations (including the consequential amendments, if any) is expected to have no material impact on the financial statements of the Group upon their initial application except as follows:-

MFRS 9 (IFRS 9 issued by IASB in July 2014) replaces the existing guidance in MFRS 139 and introduces a revised guidance on the classification and measurement of financial instruments, including a single forward-looking 'expected loss' impairment model for calculating impairment on financial assets, and a new approach to hedge accounting. Under this MFRS 9, the classification of financial assets is driven by cash flow characteristics and the business model in which a financial asset is held. Therefore, it is expected that the Group's investments in unquoted shares that are currently stated at cost less accumulated impairment losses will be measured at fair value through other comprehensive income upon the adoption of MFRS 9. The Group is currently assessing the financial impact of adopting MFRS 9.

MFRS 15 establishes a single comprehensive model for revenue recognition and will supersede the current revenue recognition guidance and other related interpretations when it becomes effective. Under MFRS 15, an entity shall recognise revenue when (or as) a performance obligation is satisfied, i.e. when 'control' of the goods or services underlying the particular performance obligation is transferred to the customers. The amendments to MFRS 15 further clarify the concept of 'distinct' for the purposes of this accounting standard. In addition, extensive disclosures are required by MFRS 15. The Group anticipates that the application of MFRS 15 in the future may have a material impact on the amounts reported and disclosures made in the financial statements. However, it is not practicable to provide a reasonable estimate of the financial impacts of MFRS 15 until the Group performs a detailed review.

The amendments to MFRS 107 require an entity to provide disclosures that enable users of financial statements to evaluate changes in liabilities arising from financing activities, including both changes arising from cash flows and non-cash changes. Accordingly, there will be no financial impact on the financial statements of the Group upon its initial application. However, additional disclosure notes on the statements of cash flows may be required.

#### A3. AUDITORS' REPORT

The auditors' report of the preceding financial period of the Group was not subject to any qualification.

**A4. SEASONAL OR CYCLICAL FACTORS**

**i) FABRIC PRODUCTION SEGMENT**

The Group's sales of fabric products are subject to seasonality effect by virtue of fabrics being a primary input material of fashion and some household products. The majority of the Group's customers are downstream players, i.e. export-oriented garment manufacturers. As such, sales of the Group's fabric products are affected by factors such as change in fashion trends, consumer taste and surge in demand ahead of festive seasons. Economic outlook inevitably will also have a significant impact on the demand of fabric finished products, and hence on the demand of fabrics.

Exchange rates fluctuation and the generally higher production costs (primarily arisen from higher wages, costs relating to compliance to environmental protection rules and utilities costs) do impact the financial performance of fabric production.

Consumer sentiment is another important factor that impacts earnings of the fabric production segment, given their spending pattern differs at different stages in the economic cycle, which affects the demand for fashion products and consequently the demand over the Group's fabric products.

**ii) PROJECT MANAGEMENT SERVICES AND INFRASTRUCTURE CONSTRUCTION SEGMENT**

Business operations of the Group's project management services and infrastructure construction segment is not significantly affected by seasonal or cyclical factors.

**B3. PROSPECTS**

**a) FABRIC PRODUCTION SEGMENT**

The recent tension from trade war between US and China has exerted tremendous pressure on the group's overall sales. In addition, the slow recovery pace of global economy, development of China gross domestic product trend in the coming years, economic policies, coupled with higher manufacturing overheads, especially wages and utilities, are still affecting the Group's financial performance, particularly when the Group is operating in the fast-moving consumer goods segment which demand is highly dependent on trend and fashion.

The China government imposes more stringent requirements, including the type of fuel allowed in production processes on the back of environment protection concern. Moving forward, the Group anticipates higher fuel costs resulted from the compulsory switch from coal to liquefied natural gas used in its production process.
