### 17. Comment On Financial Results (Current Quarter Compared With The Preceding Quarter)

The Group turnover in the thrid quarter of 1999 improved to RM6.7 million as compared to RM6.2 million in the second quarter. The Group loss before tax and exceptional item in the third quarter of 1999 was reduced to RM0.25 million as compared to RM3.1 million in the second quarter of 1999. This was mainly due to better margin from the retail sales.

#### 18. Review Of Performance Of The Company And Its Principal Subsidiaries

The Group's results for the year to date continued to suffer a loss due to high interest charges and the write-down of stocks and debtors although monthly operating revenue has been improving due to the obility to purchase new stocks and the improving general economy.

#### 19. Prospects For The Current Financial Year

The Group foresees a more competitive business environment as a result of more significant competition in the market. The decorative lighting business in Malaysia and Singapore has seen a shift to lower cost suppliers from China compared to European sources thereby resulting in lower selling prices and gross profit. The non-renewal of tenancy of a major showroom in our Singapore subsidiary has resulted in its closure in August 1999. We expect lower color from our Singapore subsidiary before the new showroom opened as replacement in November 1999 and achieving its full sales potential. Accordingly, the Special Administrators expect that the Group will continue to suffer an operating loss for for the year at the current level. The Special Administrators are in the process of preparing a plan for the proposed restructuring of the Group to improve its financial position and future results.

#### 20. Variance Of Actual Profit From Forecast Profit/Profit Guarantee
