During the quarter ended 31 Mar 2024, the Renewable & Waste-to-Energy Division recorded a decline in revenue by 10.4% to RM48.1 million from RM53.7 million and a loss before tax of RM1.3 million as compared to a loss before tax of RM1.0 million recorded in the corresponding quarter.

The decline in revenue in current quarter was mainly due to decline in crude palm oil ("CPO") sales volume which drop to 10,014 ton as compared to previous year of 11,484 ton. The oil extraction rate ("OER") also decline to 18.55% from 18.66% as compared to previous year corresponding quarter resulting higher loss before tax.

2. Comment on Material Changes in Profit Before Taxation Against Immediate Preceding Quarter

The material changes in profit before taxation for the current quarter as compared to the immediate preceding quarter are as follow:

	Current Quarter	Immediate Preceding Char Quarter		nges	
	31/3/2024	31/12/2023	Amount %		
Loss before taxation	(13,525)	(3,227)	(10,298)	-319.1%	

The material changes are mainly due to the following:

- i.) Fire Services division recorded a loss of RM2.4 million as compared to a profit of RM1.4 million. The loss was mainly due to a provision for debts on impairment and expected credit loss amounting RM3.4 million.
- ii.) Property, Development & Construction division recorded a loss of RM3.3 million as compared to a loss of RM0.5 million recorded in the previous quarter. The loss from the current quarter was derived from contract variations order as project approaching end of progress work and higher operational cost.

3. Commentary of Prospects

Despite the challenging market environment, the Group managed to keep the situation under control with the necessary mitigation actions taken particularly on cost rationalisation and business protection measures implemented earlier.

The Fire Services segment, being dependent on building and construction activities had been impacted by the softening of properties market, which caused delay in work progress and certification of work done. Following thereto, the division is striving to catch-up on its order book work progress to generate revenue and profitability.

The Property Development & Construction segment has achieved a significant milestone in the current quarter of 2024 with the completion of Phase 2 (Belleza) at Taman Putra. This project successful completion signified our ongoing commitment to deliver high-quality residential projects. In parallel, we are proactively advancing our next project for the re-development of Plaza Perkelilling. The team is currently preparing the submission of the building plan for this redevelopment, marking the initial steps of transforming this property into a modern, multi-functional office building. This re-development project aligns with our strategic objective to maximise the value of our existing assets, ensuring they meet contemporary market demands and contribute to our long-term growth.

Renewable & Waste-To-Energy segment businesses remain robust despite the challenging economic and labour shortage. The CPO price is projected to remain around RM3,000 to RM4,000 per metric tonne supported by increase in the cost of labour and raw material. For the past few quarters, the mill has experienced a drop in the Fresh Fruit Bunch processing quantity due to the unpredictable weather pattern and El Nino effect on the global scale. Against the backdrop, the management is steadfast in focusing on the mill efficiency and production output while maintaining strict cost management to improve the Group financial position. We also expect the improvement in the Fresh Fruit Bunch processing quantity to improve as the El Nino season is over. The oil extraction rate of the FFB and the operating margins in this milling industry have historically been seasonal. Changes in weather pattern and FFB seasons, both will affect the oil content in the FFB and volume and the resulting oil extraction rate are key factors that influence the profitability of the milling industry.

The medical waste market (for non-concessionaires) continues to be strictly regulated by the authorities and highly competitive in pricing. There has been increase in the medical waste collection quantity and hence increase in the demand of our service. Moving forward to the age of digitalization, we have implemented the use of e-Consignment Note (eCN) to improve the traceability and efficiency of our logistic and waste collection. It is vital to ensure compliance of SOP for the safe handling and disposal of medical waste to prevent cross-contamination exposure to the public and operation staff.

Premised on the above, the Group remains cautious but is optimistic about its prospects for the year. The Group will continue to manage its cash flows prudently and monitor closely its business operations amidst a challenging business environment.
