B3 Current year prospects

Global economy

For the third quarter of 2023, the global economy continued to grow modestly. China recorded a year-on-year growth of 4.9%, underpinned by a solid recovery in retail sales of consumer goods. Meanwhile, the United States and Euro area grew 2.6% and 0.1% respectively. In October 2023, the IMF has estimated that the global growth will slow from 3.5% in 2022 to 3.0% in 2023. Downside risks include higher-than-expected inflation, prolonged geopolitical tensions, and persistent tight financial conditions.

Malaysian economy

On the domestic front, Malaysia recorded a higher year-on-year growth at 3.3% for the third quarter of 2023 (2Q2023: 2.9%) underpinned by continued improvement in household spending and public consumption. Going forward, the Malaysian economy is expected to achieve a GDP of approximately 4% for 2023, supported by resilient domestic demand. Nonetheless, domestic growth is subject to headwinds of weaker-than-expected global trade activities and rising geopolitical tensions.

B3 Current year prospects (continued)

Prospects for the Group

For the aluminium segment, the stabilisation of the global aluminium prices augurs well for us as our primary raw material is aluminium billet. However, the weakening of the Malaysian Ringgit vis-à-vis the USD has increased the costs of our imported billets. We will continue to closely monitor our operational costs and selling prices to maintain our margins.

For the property segment, the cumulative sales for the SASaR and PSV 1 Residences as of 31 October 2023 were 90.8% and 62.8% respectively, while cumulative construction progress were 35.7% and 21.3% respectively. The projects will continue contributing positively to the Group as and when we achieve higher sales and work progress.

Barring unforeseen circumstances, the Board is cautiously optimistic that the Group will be profitable for the forthcoming quarter.
