1. Group's Financial Performance Review And Segmental Analysis (continued)

A. Overall Review of Group's Financial Performance

The higher revenue of RM99.37 million (2018: RM77.16 million) recorded for the financial period ended 30 June 2019 was mainly due to higher sales of USD5.48 million from the Moulded Power Supply Cord Sets Division in Indonesia. The reasons for the higher revenue were mainly due to higher demand from existing customers and the rescheduling of certain shipment delivery from first quarter to second quarter of 2019. The depreciation of RM against the USD also increased the Group's revenue which is denominated in RM. The average exchange rate used for the financial period ended 30 June 2019 was RM4.1252/USD (2018: RM3.9376/USD).

The turnaround from loss before taxation of RM2.31 million for the financial period ended 30 June 2018 to profit before taxation of RM0.13 million for the financial period ended 30 June 2019 were mainly due to the followings:

- i) Higher profit before taxation of RM4.41 million (2018: RM3.13 million) generated from the Moulded Power Supply Cords Set Division;
- ii) Lower loss before taxation of RM4.08 million (2018: RM5.25 million) in the Investment Division;
- iii) Lower loss before taxation of RM0.12 million (2018: RM0.28 million) in the Wire and Cable Division; and
- iv) The disposal of Tin Mining Division on 6 December 2018 which incurred a loss before taxation of RM0.63 million for the financial period ended 30 June 2018.

[Notes to Quarterly Financial Report – continued]

PART B – Additional Information Required By BMSB's Listing Requirements (continued) 1. Group's Financial Performance Review And Segmental Analysis (continued)

B. Summary of Statement of Financial Positions of the Group (continued)

The increase of RM14.97 million or 26.5% in current assets were mainly due to increase in inventories and prepayment of RM2.27 million and RM2.86 million respectively for the purchase of raw materials to cater for the sales orders in the third quarter of 2019. In addition, there was an increase in trade receivables of RM8.74 million from the higher sales recorded in 2Q 2019 and advances of RM1.94 million to the associate of the Company for working capital requirement. However, the increase was reduced by decrease in cash and bank balances of RM0.89 million used to finance the working capital despite the inflow of RM2.92 million received from the Private Placement.

The increase of RM15.66 million or 32.6% in current liabilities were mainly due to the followings:

- i) Reclassifications of promissory notes payable in long term liabilities in 4Q 2018 of RM2.07 million into current liabilities; and
- ii) Drawdown of the remaining promissory note of RM2.02 million.

 Also contributed to the higher current liabilities are the following payables to finance the higher sales recorded in 2Q 2019 which includes:
- iii) Higher trade payables of RM7.95 million;
- iv) Higher bank trade facilities drawdown of RM0.58 million; and
- v) Higher other payables and accruals of RM2.58 million.

The decrease of RM2.24 million or 15.5% in non-current liabilities were mainly due to reclassifications of promissory notes of RM2.07 million from non current liabilities into current liabilities and long term borrowings of RM0.41 million into short term borrowings after scheduled repayment to financial institutions.

The increase in "equity attributable to owner of the Company" of RM1.70 million or 5.7% was mainly due to RM2.92 million proceeds received from the issuance of new ordinary shares pursuant to the private placement of shares. The increase was reduced by the total comprehensive loss for the period attributable to the owners of the Company of RM1.19 million.

The changes in non-controlling interest ("NCI") from RM466,000 to RM6,000 was due to the acquisition of the remaining 49% from NCI not wholly owned by the Company as stated in Note 13 of Part A above.

The increase in "total equity" of RM1.24 million or 4.1% was mainly due to RM2.92 million proceeds received from the issuance of new ordinary shares pursuant to the private placement of shares. The increase was reduced by the total comprehensive loss attributable to owners of the Company for the period of RM1.19 million and the reduction of NCI of RM0.46 million.

Note: "The rest of Asia" refers to Indonesia, Singapore, Thailand, Vietnam and Taiwan.

The sales to North America increased by USD1.41 million or 7.9% for the financial period ended 30 June 2019 due to higher demand from existing customers and rescheduling of certain shipments delivery from first quarter to second quarter of 2019.

The sales to "the rest of Asia" was USD4.31 million, an increase of USD3.10 million or 257.0% as compared to the preceding year's corresponding period. Included in the sales to "the rest of Asia" is an amount of USD3.16 million from North American buyers who purchased via the Taiwanese trading house.

There were no sales in the Wires and Cables Division for the current quarter under review as compared to USD14,000 for the preceding year's corresponding period mainly due to the following:

- Local manufacturers had shorter lead time and accept smaller quantity purchase compared to bulk import.
- Volatility of RM against USD discouraged local customers to import and instead place orders with local manufacturers to minimize their foreign currency exposure.

- (b) Availability of smaller quantity order compared to bulk import and with longer credit term given.

The lower loss before taxation of RM0.12 million for the financial period ended 30 June 2019 were mainly due to net unrealised foreign currency exchange loss of RM0.01 million and finance costs of RM0.10 million. The preceding year's loss before taxation of RM0.28 million were mainly due to net unrealised foreign currency exchange loss of RM0.03 million and finance costs of RM0.10 million. 2. Comparison of Current Year's Quarter Against Preceding Year's Corresponding Quarter's Result (Individual 2nd Quarter 2019 vs Individual 2nd Quarter 2018)

The higher revenue of RM62.03 million (2Q 2018: RM37.45 million) recorded for the current quarter were mainly due to higher sales of USD14.70 million (2Q 2018: USD9.22 million) from the Moulded Power Supply Cord Sets Division in Indonesia. The reasons for the higher revenue were mainly due to the higher demand from existing customers and the re-scheduling of certain shipment delivery from the first quarter to second quarter of 2019. The depreciation of RM against the USD also increased the revenue of the Group in RM denomination. The average exchange rate used for the current quarter was RM4.1252/USD (2Q 2018: RM3.9376/USD).

The higher profit before taxation of RM0.88 million (2Q 2018: RM0.61 million) recorded for the current quarter was mainly due to higher revenue generated from the Moulded Power Supply Cords Set Division.

The Group's revenue for the current quarter increased by RM24.68 million or 66.1% as compared to its immediate preceding quarter. The higher revenue were mainly due to seasonal higher sales of USD14.70 million (1Q 2019: USD8.79 million) and the rescheduling of certain shipment delivery from 1Q 2019 to 2Q 2019. The depreciation of RM against the USD in the current quarter has also increased the RM revenue. The average exchange rate used for the current quarter was RM4.1252/USD (1Q 2019: RM4.1015/USD).

- ii) Lower loss before taxation in the Investment Division of RM1.96 million (1Q 2019: RM2.12 million).

4. Commentary on Prospects

The trade war between US and China may have a favourable effect on the sale of moulded power supply cord sets as the sales to US accounts for majority of the Group's revenue.

However, the Board is of the opinion that business operations in moulded power supply cord sets and wire and cable remain challenging in view of the intense competition in the US market, rising inflationary cost in Indonesia, especially the compulsory annual increment of wages and salaries, high volatility of copper price and high working capital requirement. Also, the on-going trade war has caused uncertainties in the global market which may affect the demands and our Group's revenue as well.

To counter these unfavourable conditions, the Moulded Power Supply Cord Sets Division will continue to focus on lean manufacturing process for better operational productivity, improve efficiencies, and better product quality in order to be more competitive and attract more customers.

The Group's 49% owned travel retail business, Dufry HWG Shopping Sdn Bhd commenced its retail business in February 2018 and gradually fully opened to shoppers in October 2018. From the improved revenue and lower loss before taxation recorded in the first half year of 2019, the Board is hopeful that this new venture will provide additional profit from the share of operating results after tax of the associate in the near future.

Barring unforeseen circumstances, the Group is targeting to achieve better operating and financial performance for the financial year ending 31 December 2019.

Meanwhile, the Board will continue to explore viable, synergistic and profitable business ventures to improve the Group's performance.

5. Profit Forecast or Profit Guarantee

The Group did not issue any profit forecast or profit guarantee for the financial year ending 31 December 2019.
