The increase in revenue as compared to the preceding year mainly attributable to the increase in the sales of FFB due to increase in average selling price realised under the plantation division and higher sales for the frozen durian products under the manufacturing and trading division to overseas customers especially in China. In addition, further contribution to the increased revenue was derived from sales of fresh whole durian fruits from our newly acquired durian farm in Melaka and contract farming leases in Pahang. In tandem with this, a profit after tax was registered as compared to a loss after tax in the preceding year correponding period.

For the current quarter ended 31 March 2021, the Group reported a decrease in revenue to RM18.9 million from RM27.6 million and profit before tax of RM2.9 million as compared to RM3.9 million in the immediate preceding quarter. The decrease of approximately 32% in the revenue for this current quarter was mainly attributable to lower sales contribution from the oil palm and durian orchard in the plantations division and manufacturing and trading division. This is attributable to the annual lower harvesting seasons for oil palm which has typically reduced the production for FFB. The lower sales under the manufacturing and trading division was mainly due to the Chinese New Year festive season which had resulted in lower deliveries to China.
