Adoption of the above did not have any significant effects on the interim financial report upon their initial application.

IC Int. 15 Agreements for the Construction of Real Estate was withdrawn by MASB and no longer effective for accounting periods beginning on or after 1 January 2012. This interpretation clarifies when and how revenue and related expenses from the sale of a real estate unit should be recognized if an agreement between a developer and a buyer is reached before the construction of the real estate is completed. Furthermore, the Interpretation provide guidance on how to determine whether an agreement is within the scope of FRS 111 Construction Contracts or FRS 118 Revenue.

During the financial year ended 31 December 2010, the Group had early adopted IC Interpretation 15 Agreements for the Construction of Real Estate and recognized such revenue at completion, or upon or after delivery of the development properties.

Following the withdrawal of this Interpretation, the Group changed its accounting policy to recognize revenue arising from property development projects using the stage of completion method in accordance to FRS 201 Property Development Activities.

Property, plant and equipment

As from 1 January 2013, the Group changed its accounting policy to measure its freehold and leasehold land and buildings at fair value less accumulated depreciation and impairment losses recognized after the date of the revaluation. Valuations are performed with sufficient regularity to ensure that the carrying amount does not differ materially from the fair value of the freehold land and buildings at the reporting date.

Any revaluation surplus is recognized in other comprehensive income and accumulated in equity under the asset revaluation reserve, except to the extend that it reverses a revaluation decrease of the same asset previously recognized in profit or loss, in which case the increase is recognized in profit or loss. A revaluation deficit is recognized in profit or loss, except to the extent that it offsets an existing surplus on the same asset carried in the asset revaluation reserve.

Any accumulated depreciation as at the revaluation date is eliminated against the gross carrying amount of the asset and the net amount is restated to the revalued amount of the asset. The revaluation surplus included in the asset revaluation reserve in respect of an asset is transferred directly to retained earnings on retirement or disposal of the asset.

As a result of the changes in the Group's accounting policy to measure its freehold and leasehold land and buildings at fair value, there is a fair value adjustments of RM86.8 million recognised in the carrying amount of the property, plant and equipment since the first quarter of 2013. Correspondingly, as a result of the fair value adjustment, there is a deferred tax impact on the fair value adjustment amounting to RM16.6 million. Hence, the net amount of RM70.2 million was recognised in the asset revaluation reserve in the statement of changes in equity.

Malaysian Financial Reporting Standards (MFRS Framework)

On 19 November 2011, the Malaysian Accounting Standards Board (MASB) issued a new MASB approved accounting framework, the Malaysian Financial Reporting Standards.

The MFRS Framework is to be applied by all Entities Other Than Private Entities for annual periods beginning on or after 1 January 2012, with the exception of entities that are within the scope of MFRS 141 Agriculture (MFRS 141) and IC Interpretation 15 Agreements for Construction of Real Estate (IC 15), including its parent, significant investor and venturer (herein called 'Transitioning Entities').

Transitioning Entities will be allowed to defer adoption of the new MFRS Framework until 1 January 2015. Consequently, adoption of the MFRS Framework by Transitioning Entities will be mandatory for annual periods beginning on or after 1 January 2015.

As certain of the Group's subsidiaries fall within the scope definition of Transitioning Entities, the Group will prepare financial statements using the MFRS Framework in its first MFRS financial statements for the year ending 31 December 2015. In presenting its first MFRS financial statements, the Group will be required to restate the comparative financial statements to amounts reflecting the application of MFRS Framework.

The majority of the adjustments required on transition will be made, retrospectively, against opening retained profits.

The Group has commenced transitioning its accounting policies and financial reporting from the current FRS Framework to the MFRS Framework by establishing a project team to plan and manage the adoption of the MFRS Framework.

At the date of these interim financial statements, the Group has not completed its assessment and quantification of the financial effects of the differences between the FRS Framework and MFRS Framework. Accordingly, the consolidated financial performance and financial position as disclosed in these financial statements for the year ended 31 December 2012 could be different if prepared under the MFRS Framework.

The Group considers that it is achieving its scheduled milestones and expects to be in a position to fully comply with the requirements of the MFRS Framework for the financial year ending 31 December 2015.

The increase was mainly due to increase in average selling prices of live broilers and table eggs sold during the nine months period ended 30 September 2013 as compared to corresponding period ended 30 September 2012.

The property development segment posted a higher revenue of RM24.01 million in the nine months period ended 30 September 2013 as compared to the revenue of RM10.15 million in the corresponding period ended 30 September 2012, an increase of 137%. 15. Comparison to Preceding Quarter's Results

The Group's performance for the current year's third quarter ended 30 September 2013 compared to the second quarter ended 30 June 2013 is as shown in Table C below:

Table C

	3 months	3 months	Increase/(Decrease)	
Description	ended	ended	RM'000	%

For the current quarter ended 30 September 2013, the poultry segment posted a higher revenue of RM103.61 million compared to the turnover of RM97.92 million recorded in the previous quarter ended 30 June 2013, a increase of 6%. The increase was mainly due to increase in selling price of live broilers and increase in sales volume and selling price of table eggs during the current quarter ended 30 September 2013. This is partially offset by a decrease in sales volume of live broilers and processed poultry products.

The property development segment posted a higher revenue of RM7.54 million in the current quarter ended 30 September 2013 as compared to the revenue of RM3.84 million in the preceding quarter ended 30 June 2013, an increase of 96%. The Group posted a profit attributable to owners of the parent of RM1.70 million during the current quarter ended 30 September 2013 as compared to a profit attributable to owners of the parent of RM1.72 million during the previous quarter ended 30 June 2013. This was mainly due to the impact of increase in selling price of live broilers and increase in sales volume and selling price of table eggs during the current quarter ended 30 September 2013. In addition to this, there was a decrease in production cost due to decrease in price of imported raw feedstuff during the quarter under review.

However, the above was offset by the impact of decrease in sales volume of live broilers and processed poultry products.

16. Prospects

Though the current purchase prices of imported raw materials are higher than the average purchase prices in the quarter under review, the selling prices of live birds and table eggs remained stable. With these, the Group cautiously expects to report a positive set of results in the final quarter of the financial year ending 31 December 2013.
