#### **17. Review of performance**

The Group revenue for the current quarter was higher at RM168.6 million as compared to RM134.5 million in the preceding quarter. The increase in Group revenue was mainly due to the higher revenue of the Equipment Manufacturing segment of RM21.6 million as a result of a greater demand for its storage device testers. The Aerospace segment registered an increase in revenue of RM9.7 million; out of which RM7.6 million was due to the impact from the higher USD/RM during the quarter. The revenue of the Precision Engineering segment also increased by RM2.8 million during the quarter.

The Group profit before tax for the current quarter was RM20.1 million compared to RM14.9 million in the preceding quarter. The higher profit of all the operating segments were due to the higher revenue, higher USD/RM and higher group exchange gain during the quarter.

#### 18. Variation of results against immediate preceding year's corresponding quarter

The Group revenue for the quarter was RM168.6 million; an increase of RM56.3 million as compared to RM112.3 million in the corresponding quarter of the preceding year. The increase was mainly due to the increase in revenue from the Equipment Manufacturing segment of RM40.6 million as a result of higher demand for its storage device testers and the Aerospace segment of RM12.7 million and this was due mainly to a higher USD/RM following the strengthening of the USD during the current quarter.

The Group profit before tax for the quarter was RM20.1 million compared to RM7.4 million in the corresponding quarter of the previous year. The higher Group profit before tax of RM12.7 million during the current quarter was mainly due to the higher group revenue, impact from a higher USD/RM and favorable foreign exchange movement during the quarter compared to the corresponding quarter of the previous year.

#### **19.** Current year prospects

We expect the revenue from the aerospace industry which accounts for about 54% of our Group revenue to remain stable.

The semiconductor equipment business remains flat and the capital expenditure budgets by the semiconductor manufacturers are deferred until new capacity is required. Notwithstanding the short-term uncertainty in the semiconductor equipment industry, the Board of Directors anticipates that the longer term future demand for the industry is still intact and will continue to grow, driven by increasing global demand for mobile computing and internet of things.

On the other hand, the outlook for the storage device testing industry remains positive.
