Revenue	41,074	39,589
Profit before tax	258	465

The Group recorded a 3.7% increase in revenue to RM 41.1 million for the 4th quarter ended 30 June 2022 from RM39.6 million in the corresponding quarter last year. The increase in turnover was mainly due to higher sales from the local subsidiaries in the current quarter under review.

The Group recorded lower profit before tax of RM 0.3 million compared to RM 0.5 million generated in the corresponding quarter last year despite high revenue in the current quarter. The lower profit before tax was mainly due to escalating costs of material and labour combined with the effect of a weakening Ringgit that impacted local subsidiaries' performance. The local subsidiaries losses were offset by profit recorded by the overseas subsidiary and also partly offset by the reversal of allowance for expected credit loss on other receivables and stock obsolescence as well as gain on disposal of property, plant and equipment in current quarter under review.

15. Material change in Profit Before Taxation reported on as compared with the immediate preceding quarter

	3 months ended 30/06/2022 RM'000	3 months ended 31/03/2022 RM'000
Revenue	41,074	39,499
Profit before tax	258	752

The Group recorded a 7% increase in revenue to RM41.1 million for the 4th quarter ended 30 June 2022 from RM39.5 million in the preceding quarter. The increase in turnover was mainly due to higher sales from oversea subsidiary in current quarter under review.

The material change in profit before tax that the Group recorded of RM 0.3 million as compared to RM 0.8 million in the preceding quarter was mainly due to loss incurred by local subsidiaries from significant increase in cost of material and labour.

16. Current year prospects

The Group's business continue to face increasing cost pressures from higher raw material prices, increasing shipping costs and a weakening of the Ringgit that impacts the Group's costs of goods imported. Together with the impact of the new national minimum wage policy from May 2022 onwards, these cost increases are expected to negatively affect the Groups' results potentially until the end of 2022.

The Group will remain focused on improving the efficiency of operations as well as introduce measures to minimise the operating costs where possible to keep costs under control. In this regard, the Group will review monthly expenditures, seek more competitive prices of raw materials as far as is possible and implement other operational cost reduction initiatives. Nevertheless, the increasing costs of business for the Group caused by external factors has necessitated an increase in selling prices of some the Groups' products in conjunction with the above cost minimisation endeavours.

Despite the challenges, we remain proactive in addressing the issues ahead and are cautiously optimistic of a positive performance in the coming quarters.

17. Variance of actual and forecast profit

Not applicable as no profit forecast was published.
