Forward exchange contracts - at fair value

- Current assets

7

11

- Current liabilities

Forward exchange contracts are used to hedge the exposure to currency risk. The Group does not apply hedge accounting. As at 31 March 2022, the Group had contracts with financial institutions due within 1 year to buy RM8,203,000 and sell USD1,950,000 at contractual forward rates.

The fair values of forward exchange contracts were quoted by the financial institutions, which normally measured the fair values using present value technique by discounting the differences between contractual forward prices and observable current market forward prices using risk-free interest rate (i.e. Level 2).

13. Derivatives (Cont'd)

Financial assets and financial liabilities

The carrying amounts of receivables, cash and cash equivalents, payables and loans and borrowings which are short-term in nature or repayable on demand are reasonable approximations of fair values. The fair values of long-term loans and borrowings are measured using present value technique by discounting the expected future cash flows using observable current market interest rates for similar liabilities (i.e. Level 2).

Fair Value Changes of Financial Liabilities

The Group does not remeasure its financial liabilities at fair value after the initial recognition.

Fair Value

The Group uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximising the use of relevant observable inputs and minimising the use of unobservable inputs.

The inputs to valuation techniques used to measure fair value are categorised into the following levels of fair value hierarchy:-

- (i) Level 1 quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date.
- (ii) Level 2 inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly.
- (iii) Level 3 unobservable inputs for the asset or liability.

The fair values of forward exchange contracts are measured using present value technique by discounting the differences between contractual forward prices and observable current market forward prices using risk-free interest rate (i.e. Level 2).

There were no transfers between levels of fair value hierarchy during the current interim period.

With increased demand for hygiene care, air care products and inclusion of the APE companies' revenue, the Group manage to record a revenue of RM40.19 million, an increase of RM7.90 million higher than RM32.29 million reported for Q3'21.

The Group's 9 months cumulative revenue of RM85.74 million experienced a decrease of 28% year-on-year ("YoY") when compared to 9M YTD'21. This decrease was primarily due to,

- (i) Record demand for hygiene care products in US and Europe last financial year, and
- (ii) A slowdown in demand this financial year mainly caused by our customer's overstocking and logistic issues.

The Administrative and General Expenses for this quarter is higher at RM5.66 million compared to the previous quarter of RM3.85 million as there was a one-time expense of RM0.80 million being professional fees charged out due to the completion of the acquisition for the remaining 40% equity interest in RGTSB on 25 January 2022. This one-time expense has also increased the 9M YTD'22 to RM12.45 million from RM11.82 million previously.

The Group enjoyed quarter-on-quarter ("QoQ") revenue growth of 53% (which reached RM40.19 million) when compared to Q2'22 of RM26.19 million. This is mainly due to increase in demand for hygiene care, air care products and inclusion of APE segment results. Consistent with the revenue growth, Q3'22 PBT also rose 51% QoQ to RM4.66 million.

The Group's core ODM business continues to perform strongly, contributing 81% of total revenue while TDSB and KPSB contributed the remaining 19%. Profit attributable to the owners of the Company rose to RM4.21 million from RM1.50 million after the completion of the acquisition for the remaining 40% equity interest in RGTSB in this quarter.

15. COMMENTARY ON PROSPECT

The global supply chain is still facing challenges amidst some progress made towards normalisation. The COVID-19 pandemic is still evolving. Whilst some countries are transiting into endemic phase from the pandemic phase, the fluid situation remains a concern given the risk of emergence of new variants. Meanwhile, regulatory responses could still impact the economy. In addition, the recent Russia/Ukraine conflict could also have a negative impact on the Global economy.

Nevertheless, the situation is starting to improve and management believes that the underlying demand for its core products across the segments are healthy.

Original Design Manufacturer ("ODM") *

Countries are transiting from pandemic phase to endemic phase. International borders are reopening and countries are relaxing or removing their COVID-19 controls. As a results, orders for hygiene care and air care products have increased, possibly because the COVID-19 pandemic has raised the awareness and need for better hygiene. This augurs well for the long term demand for our hygiene care products.

Meanwhile, the Group's precision spray painting and printing subsidiary has received more orders from external customers especially from the Consumer Electronics industry. This drives expansion for a new facility with an advanced robotic spray painting system in a cleanroom environment. The new robotic spray painting system will be able to achieve smoother, more consistent finishing while significantly reducing production time and wastages. The facility has commenced operations.

Automation and Precision Engineering ("APE") *

Management is focused on expanding the APE segment further in light of the current global economic recovery, the US-China trade war and opportunities arising from multinationals seeking to strengthen their global supply chain by diversifying into South East Asia.

16. Profit Forecast

The Group did not issue any profit forecast in any form of public documentation and announcement.

^{*} Please refer to Note 7 for the definition of ODM and APE segment.
